FIVE YEAR WARRANTY

All POWER/MATE products are warranted against defects in materials and workmanship for a period of five years from date of shipment.* Our obligation includes replacing, repairing, or adjusting products (except fuses) which prove to be defective during the warranty period. We cannot assume liability for consequential damages. (See detailed warranty in catalog.)

*(Shorter term of warranty wherever specifically noted.)

UL/APPROVED

Through its high standard of reliability and quality, POWER/MATE has received recognition from Underwriters Laboratory, Inc. Now, POWER/MATE power supplies are listed as a recognized component in Underwriters Laboratory's recognized component index. (UL 478-1967, Electronic Data-Processing Units and Systems.)

SAME DAY SHIPMENT

Same-Day shipment of power supply orders is an especially important part of our total service philosophy. Accordingly, our automated order processing system, in conjunction with our large-scale, automated production lines, and our carefully maintained inventory control — systematically expedite shipment of your order.

AUG 25 1972

POWER/MATE EEM CATALOG INDEX

1. Low Cost General Purpose Modular and Submodular Power Supplies (Single, Dual or Multiple Outputs)
1·1347–1·1354

2. Standard Systems Modular Power Supplies for Chassis or Rack Mounting (Single, Dual and Multiple Outputs) Including Accessories
1·1355–1·1370
1·1379–1·1396

3. High Efficiency Modular and Switching Regulated Systems Modular Power Supplies
1·1374–1·1378

4. Laboratory Power Supplies for Bench or Rack Mounting. Perfect for Test Instruments, Labs or General Purpose Use
1·1397–1·1401

5. Miniature Encapsulated Power Supplies for RAM's, ROM's, Op Amps, CMDS, etc. (AC to DC or DC to DC)
1·1402–1·1407

6. New Ferroresonant "No Switching" Magnetically Regulated Power Supplies. "More Power Per Penny" plus Extremely High Reliability
1·1371–1·1373

18TH EDITION

how to use eem 75 76

This issue of EEM is the largest, most complete catalog ever published in the electronics field. The two volumes contain more than 5,000 pages of up-to-date information. New features have been added and you may find it helpful to scan this page as a guide to the easy use of EEM.

1. INDEX OF MANUFACTURERS' CATALOG PAGES

When you need data from particular manufacturers, just look them up alphabetically in the index beginning on page 3 (green pages). More than 700 manufacturers have catalog pages in EEM, and easy reference is given for all these pages in two-number figures. The first number in bold type indicates the volume (1 or 2); the second, the page number. Example: **1**•141 means Vol. 1, page 141.

2. PRODUCT INDEX AND DIRECTORY

All products are indexed by basic type. Each product shows three groups of manufacturers:

1. **Boldface** listings with page references tell you that this manufacturer's catalog pages are right at hand in the white pages.
2. * the asterisk means that this manufacturer has catalog pages in the white section but not on this particular product.
3. Lightface listings, unmarked, means that the manufacturer has submitted a data sheet to verify that they do manufacture this product, but no further data is available in EEM.

New feature You'll find a handy Product Index and Directory in each volume. All product designations are in both volumes, but page references are given only for those products in that volume; you are referred to the other volume when the catalog pages are there.

New feature The letter "D" preceding the listing tells you that the product is available from distributors.

New feature The letter "M" preceding the listing tells you that the product is available in military specifications.

3. TRADE MARK DIRECTORY

If you have just a trade mark, this directory gives you the product it signifies and who makes it. We've black edgemarked the section for easy location. Beginning on page **2**•301 (green pages), there are more than 2500 manufacturers' trade marks listed. Once you have the product and manufacturer, look in the Manufacturers and Sales Offices Directory for complete name and address.

4. MANUFACTURERS' CATALOG PAGES

Here is the greatest collection of detailed catalog pages on electronic products available anywhere. The section is indexed by product category, alphabetically. Manufacturers' catalog pages appear in each product category in alphabetical order. There is a handy guide to the product category in each volume of EEM on the page facing page 1. The great number of catalog pages were divided into the two volumes to facilitate handling.

5. MANUFACTURERS/SALES OFFICES DIRECTORY

Here is all the data on where they are — addresses and phone numbers of main offices, branch offices, local representatives, local distributors plus local contact names and phone numbers.

NEW DATA — Additional data included this year:

a. Minimum order accepted
b. Federal Supply Code (FSC) number
c. Qualified Parts List (QPL) number
d. Individual contacts by name for price data, application information, customer service
e. Free literature offerings
f. Summary of categories of products manufactured by each company
h. Corporate logos or trade marks for easy location of manufacturers. Manufacturers with catalog pages in EEM are indicated by **boldface** listings and page number references.

6. DISTRIBUTOR'S DIRECTORY

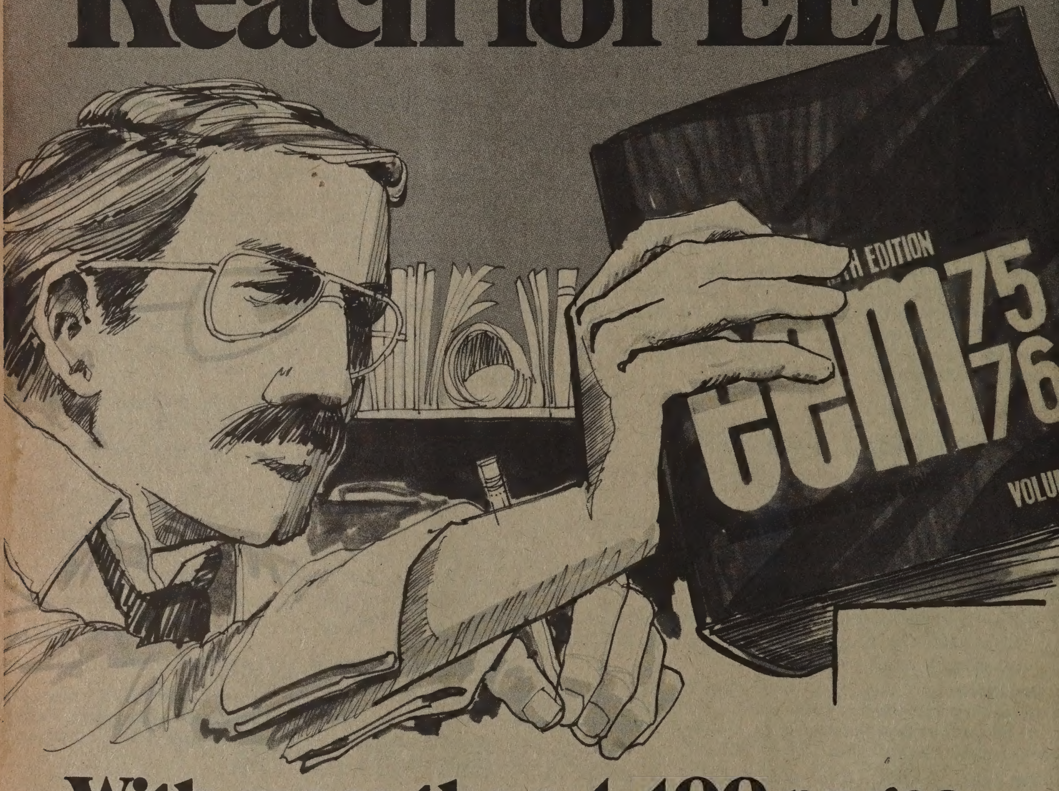
Yellow pages, black edgemarked for easy location, contain a geographic listing of electronic distributors offering name, address, phone number and sales manager. This section is to be found in Volume 2 following Manufacturers/Sales Offices Directory.

Your enthusiastic response and usage of EEM has helped make this edition the largest ever. Each year, we try to incorporate new features to make EEM better and easier to use. Your comments and ideas are sincerely welcomed. Please write Editorial Director, United Technical Publications, 645 Stewart Avenue, Garden City, N. Y. 11530.

EEM is published by United Technical Publications, div. of Cox Broadcasting Corp. Other publications serving the electronics industry are Electronic Products Magazine, O-T-S Catalog, IC Update Master, Electronic Marketing & Management (EM/M), Off the Shelf Magazine, Electronics Retailing and United's Cost and Pricing Service.

There is more catalog data available to you at your fingertips than ever before...when you

Reach for EEM



With more than 4,400 pages of product data from 700 manufacturers of electronic products in EEM.

645 STEWART AVE., GARDEN CITY, N.Y. 11530 (516) 248-9700

OVER 100,000 STRONG

Every month over 100,000 buyers and specifiers like yourself receive Electronic Products Magazine . . . that makes us the largest electronics magazine around. And we're the largest for a darn good reason . . . we give you what you need: a practical editorial approach . . . one that's application and new product oriented. Editorial that offers solutions to the problems you face in your everyday task of designing and building electronic systems and subassemblies. The type of information you can put to use now.

If you're not getting EPM . . . why not write our circulation manager for a qualification form and join the over 100,000 strong.

PRODUCT INDEX AND DIRECTORY

The Product Index and Directory is designed to help locate manufacturers of specific types of electronic products. Products are listed alphabetically with many helpful cross references. The product categories are arranged in the following manner: general product type, specific description. For example, Microwave Generators is listed under Generators, Microwave; Solid State Lamps are found under Lamps, Solid State.

After each Product heading is an alphabetical listing of manufacturers who make that product. Those manufacturers appearing in boldface type with volume and page numbers have catalog data in the white pages of EEM. The volume number appears first, before the bullet, the page number is listed after it. Manufacturers who make the product but who may not have it listed among their catalog pages are in boldface with an asterisk. Manufacturers listed in lightface make the product but have not provided any catalog pages. Those manufacturers marketing the product through distributors have a "D" to the left of their names. Those who manufacture it to meet military specifications have an "M."

Abrasive Belts, Compounds, Cords, Powders, etc.—See Volume 2

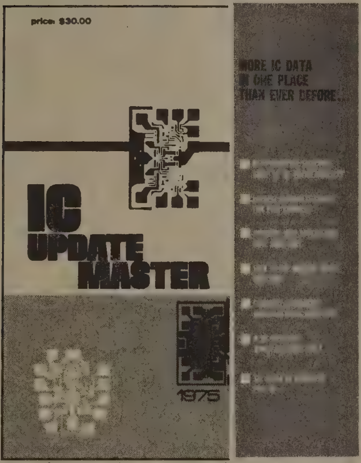
ATT: IC USERS

NOW YOU CAN GET AN OVERVIEW OF EVERY IC AVAILABLE WITHOUT GOING THROUGH DOZENS OF SEPARATE CATALOGS.



Here's something you've been wanting for years . . . and it's finally here. United Technical Publication, the publishers of Electronic Products Magazine and Electronic Engineers Master (EEM) has worked for two years putting together the most comprehensive IC catalog/directory ever published . . . it's called IC Update Master.

The heart of this invaluable reference book is a Master Function Index. It allows you to survey the **entire** IC industry . . . it gives you an overview of what's available by device number and manufacturer . . . you no longer have to thumb through dozens of manufacturers' catalogs to find the device you need.

IC Update Master also contains the most useful Alternate Source Directory in the industry. It is the only place you can go to find a listing of **all** manufacturers that make a pin-for-pin functional equivalent device.

And there's a lot more in its over 1000 pages for you...

Part Number Construction . . . listing each IC manufacturer's standard part numbers, with prefixes and their meanings.

Application Note Directory . . . containing current IC application notes arranged by subject matter and cross-referenced by device number.

Military Parts Directory . . . with functional cross-reference to QPL (Qualified Product List) devices.

Manufacturers and Distributors Directory . . . listing the IC manufacturers' field sales offices, representatives and distributors.

Manufacturers' IC Catalog Data . . . additional IC manufacturer data arranged alphabetically.

And just to make sure you keep right on top of things all year long, we publish quarterly supplements with all the modifications and new products and developments in the IC industry.

When you get the IC Update Master you'll wonder how you've gotten along without it.

Send check or money order for $30.00 to:

Why share your EEM?

The 1975-76 edition of EEM contains more than 4,400 pages of detailed product data from over 700 manufacturers of electronic products. A proven valuable catalog/directory for the working engineer, EEM also contains:

- ☐ a product index listing of more than 3,000 product headings
- ☐ an alphabetical listing of manufacturers, listing their mailing address, key sales personnel and sales offices, representatives and distributors
- ☐ a trade mark directory matching the company name with the trade mark and a description of the product
- ☐ a distributor directory of all the leading electronic distributors listed geographically.

To be sure you won't be faced with the problem of standing on line to use your company's EEM, order your own copy today!

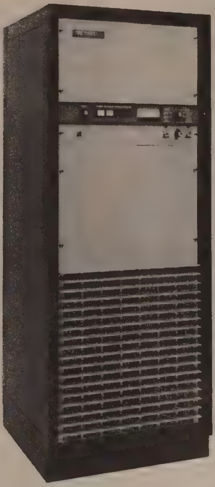
AMPLIFIER RESEARCH

160 SCHOOL HOUSE ROAD
SOUDERTON, PA 18964
PHONE 215 723 8181

Choose from the FIRST FAMILY of broadband amplifiers.

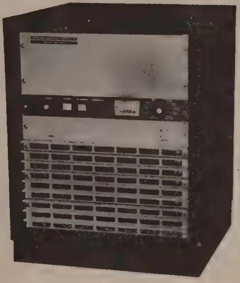
First in design, reliability, capability for lab applications



Model 1000L
10 kHz to 220 MHz

Model 30L
1 to 250 MHz

Model 100L
10 kHz to 220 MHz



Model 500L
10 kHz to 220 MHz

Amplifier Research now offers you a complete family of reliable, unconditionally stable broadband amplifiers for laboratory applications that require instantaneous bandwidth, high gain, and moderate-to-high power output. Whether you're performing wattmeter calibration, antenna and component testing, EMI susceptibility, or similar testing, you can select the amplifier that's just right for your application.

The completely self-contained units shown here – 30 watt, 100 watt, 500 watt, and 1000 watt – and our 5000 watt unit are typical of the functional design and simplicity of operation characteristic of Amplifier Research's entire product line. Look beyond the smart styling for many outstanding features, like unique protective circuits for operation without shutdown or damage – regardless of source and load impedance. Other features include solid-state circuitry in low power stages, unconditional stability, low harmonic distortion, rugged, lightweight construction, no tuning, and much more.

Choose from the value leaders!

30L, a low-cost, high-performance amplifier unmatched in its class . . . 100L, 500L, and 1000L, versatile, reliable, economical amplifiers that provide full-rated swept power output. The 5000LA is the only commercially available amplifier providing 5000 watts of swept power. Units available with up to 70 dB minimum power gain flat within ±1.5 dB to faithfully reproduce AM or FM input signals.

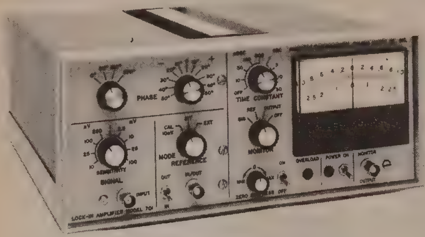
BULOVA Lock-in Amplifier



The Bulova low cost lock-in amplifier operates at any fixed frequency from 5Hz to 20 kHz as selected by changeable plug-in card.

Description

The Model 701 Lock-In Amplifier is a modular unit with each section comprised of an individual plug-in board. It is offered as a completely encased bench instrument, as a panel mounted unit fitting standard racks and in the form of individual models which can be installed at various points in a larger system. Power requirement is less than 10 amps, 50–60Hz, 110V.

Operation

The heart of the lock-in amplifier is the phase sensitive, or synchronous detector. Regardless of how much input and output filtering is used to reduce the noise, the ability to extract a signal from the noise is determined by the dynamic range of the phase sensitive detector.

The signal is fed to the synchronous detector after being amplified by a pre-amplifier and filtered in a post amplifier. Gating of the synchronous detector is accomplished by a reference signal derived from the signal source (external mode) or a reference oscillator (internal mode). The resulting, slowly varying d.c. signal is a function of the amplitude of the incoming signal and its phase with respect to the reference.

Typical Applications

The following is a list of some typical applications. These are by no means all the possible applications, which are limited only by the imagination of the user.

Radiometry (IR, visible, UV) • Spectroscopy • Dual beam optical measurements • Pollution Measurements • Magnetrometry • Amplifier gain, phase shift and transmission measurements • Strain gauge and other transducer measurements • Nuclear magnetic resonance • Hall effect measurements.

Measures very small changes in amplitude at the signal frequency to distinguish and recover weak signals from high background noise.

Available in 3 forms

1. As bench instrument completely encased
2. For panel mounting to fit standard racks
3. As modules for incorporation in larger system.

Function

The Bulova Model 701 Lock-in Amplifier is an instrument which can measure accurately very small changes in the amplitude of a slowly varying signal at the operating frequency, even in the presence of high noise levels where the signal/noise ratio is such that the change would be undetectable by other types of instruments. The Bulova unit was developed as an adjunct to its line of optical scanners and choppers and designed to be low in cost so that it could be applied broadly.

BASIC SPECIFICATIONS

Frequency:	Fixed frequency between 5 Hz, and 20KHz. Determined by a changeable plug-in board.
Sensitivity:	10 microvolts to 100 mv. rms. for full scale output. Sensitivity switch in steps of 1, 2.5, 10.
Signal Amplifier:	Input impedance over 500 megohms shunted by less than 30 Pf. Max. preamplifier gain = 100 Tuned Amplifier "Q" = 10 Max. Overall gain 2.5 x 10^5
Filter Time Constant:	10 ms to 30 seconds, in steps of 1, 3, 10.
Zero Suppress:	Uncalibrated zero suppression of up to ±100% full scale (Calibrated zero suppression optional)
Reference Channel:	Internal — Plug-in Oscillator External — 1 volt–10 volt rms, sine, square or triangular wave (45–50% duty cycle). Filtered by a bandpass amplifier which matches signal channel response. Input impedance = 20 kilohms.
Phase Control:	360° phase adjustment in 4 ranges with a continuously variable phase adjustment of ± 50° in each range.
Monitor:	BNC on front panel. Input, reference and output signal switch selectable. Source impedance—less than 2 kilohms Location—at rear of unit
Power:	115 Vac 50–60Hz less than 10W
Size:	Case model 4-3/4" high x 11-1/16" wide by 11" deep. Rack mounting available.

From Bulova Electronics Division: Frequency Control Components • Crystals • Crystal Oscillators • Monolithic Crystal Filters • Fork Oscillators • DC Servo Amplifiers • 400 Hz Servo Amplifiers • Optical Devices • Choppers and Scanners • Frequency Changers • Inverters • Lock-in Amplifiers

DYNAMICS

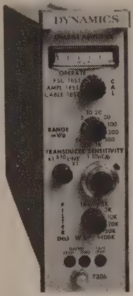
DYNAMICS ELECTRONIC PRODUCTS INC. • 9001 FULLBRIGHT AVE., CHATSWORTH, CALIF. 91311 (213) 998-0121

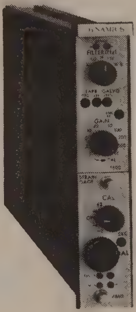
For over a decade Dynamics has been the acknowledged leader in the design and manufacture of instrumentation amplifiers for aerospace, laboratory and industrial applications. A complete range of differential, single-ended and charge amplifiers with various options and extra performance features, such as selectable filters, separate input and output zero controls and strain gauge power supply, are available. Many models have dual isolation 100mA outputs, full scale zero offset controls, galvanometer matching networks and switched or fixed current limiting provisions.

MODEL 7306 CHARGE AMPLIFIER GROUNDED TRANSDUCERS DO NOT CREATE GROUND LOOP

Suited to operate with all types of piezoelectric transducers. Up to 500 kHz bandwidth; low internal noise, excellent for all measurements.

Outstanding features: integral power supply, charge gain of .05 mV/pC to 5000 mV/pC, direct reading charge gain and capability to use Dynamics Model 7819 remote charge converter. Uses a double-shielded power supply to provide power line isolation of 1000 mΩ shunted by less than 0.1pF.





MODEL 7600 UNIVERSAL AMPLIFIER SIGNAL CONDITIONING SYSTEM

Choice of 10 front panel plug-in Signal Conditioning Modules. Amplifier features: gains to 2500; 120 dB CMRR at ±20 Volts; 125 kHz bandwidth; filter; offset control; output level controls; tape; galvo and VCO outputs; and integrated circuits. Ten Signal Conditioning Modules: isolated strain-gage power supply; auto-bridge balance; built-in reference junction and linearization for thermocouples; linear 2, 3, or 4 wire system for RTD's; Servo; Pot; Piezo Resistive; EMF; Carrier Amp; Charge Amp; and Designer's Card for universal system operation.

CORPORATION

- Differential DC Amplifiers
- Strain Gage Signal Conditioners
- Thermocouple Signal Conditioners
- Signal Conditioning Systems
- Data Acquisition Systems
- Thermocouple/MV Calibrators

MODEL 314

Miniature airborne amplifier occupies less than one cubic inch. Contains differential amplifier, strain gage excitation and power supply to operate from 28V dc. 20 kHz Bandwidth. Price $450. (Bulletin 2007)

400 ENVIRONMENTAL SERIES

- 100G Shock
- −25 to +71°C
- 0.5 μV/°C Stability
- Thermal Shock Resistant
- Bridge Excitation and Balance
- Thermocouple Conditioning
- RFI protection
- 120 dB CMR ● 100V CMV
- Rack or Stud Mounting
- 12 or 28 V dc Power ● 8 oz's.
- From $330 (Bulletin 2001A)

4000 SERIES, SIGNAL CONDITIONING SYSTEMS

The typical 4000 series system shown below is designed for Airborne or Vehicular service involving moderately high G forces. It includes 14 stable 400 series amplifiers, a monitor meter and monitor selection switch, individual CAL switches, bridge excitation, bridge balance and conditioning.

Other 4000 series systems are designed for operation during shocks up to 100 G's. Features available in these systems include integral VCO's, FET Calibration, Channel ID signals, Rechargeable Battery Pack and others. (See Bulletin 2001A)

500 ECONOMY SERIES

- 1μV/°C
- 114 dB CMR
- Gains X.01 to X2500
- 16 Amps per 3.5″ high rack
- 80 kHz bandwidth
- Filtered output
- 10 ma, 100 ma, dual outputs
- Bridge Bal., Completion, CAL
- From $155
  (Bulletin 2004A or B)

MODEL 540 — Four-channel amplifier for multi-channel data systems such as Model 6000 at right. From $400 (Bulletin 2004B)

600 INDUSTRIAL SERIES

- Strain Gage Conditioning
- Thermocouple Conditioning
- Thermocouple Linearization
- Reference Junctions
- Multifunction Amplifiers
- Bridge Excitation and Bipolar Cal.
- Expanded Scale Operation
- .2 μV/°C Zero Stability
- 120 dB CMR and 300V CMV
- 12V dc, 28V dc or 115V ac power
- From $255 (Bulletin 2005)

700 WIDEBAND SERIES

- 100 kHz Bandwidth
- Manual or Programmable Gain
- Digital Storage
- Local Readout
- 1μV/°C Zero Stability
- .003%/°C Gain T.C.
- .01% Gain Accuracy
- 300V CMV ● 126 dB CMR
- 3-pole filters ● Dual outputs
- From $415 manual gain
- From $775 programmable gain
  (Bulletin 2003A)

6000 SERIES DATA SYSTEMS

All 6000 Series Systems combine per-channel low level amplifiers with a high level multiplexer and a programmable gain amplifier to provide complete multi-channel signal processing in a small, rugged package. When equipped with Model 640 input modules, outstanding performance is provided by the chopper stabilized design which offers extremely low drift and noise and accommodates common mode voltages up to 300 volts dc or peak ac. The systems are capable of scan rates to 20,000 channels per second. Integral A-D converters are optional. Other key features are listed below.

- CMV 300V (higher on special orders)
- CMR 120 dB with 1K unbal.
- 0.5 μV Zero Stability
- .01% Gain Stability
- 3rd order filter, each channel (plug in)
- Sequential or Random Access
- 20 kHz Throughput Rate
- 64 Channels per 5.25″ high enclosure
  (Bulletin 2008)

MODEL 1100 THERMOCOUPLE SIMULATOR CALIBRATOR

Simplifies precise calibration of thermocouple measuring instruments: includes linear DC calibration capability.

THERMOCOUPLE CALIBRATIONS:
Temperature Indicators
Temperature Transmitters
Amplifiers and Linearizers
Temperature Controllers

LINEAR CALIBRATIONS:
DC Digital Voltmeters
Panel Meters
Strip Chart Recorders
Millivoltmeters

FEATURES:
Simulates 4 TC types
Dial Temperature in Degrees
Digital Conformity to NBS 0.1°

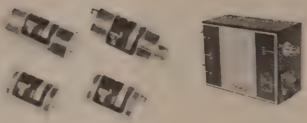
Specialists in Airborne, Marine and Industrial Instrumentation

Ectron
CORPORATION

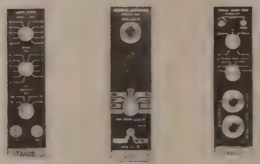
ITHACO
Versatility in AC instrumentation

Low noise AC preamplifiers



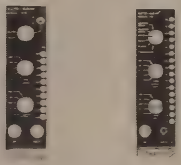
- Preamps for High and Low Impedance Sources
- Frequency Range .001 Hz to 1 MHz
- Gains to 10^5 (100 dB)
- Premium Noise Performance With Minimal Power Drain
- Voltage, Charge and Current Inputs

Instrumentation amplifiers



- Amplifiers for Voltage, Charge, and Strain Gage Inputs
- Single–Ended and Differential; Rack Mountable
- Selectable Frequency Response
- Gains to 100 dB; Frequency Range 1 Hz to 100 kHz

AUTO-GAIN® amplifiers

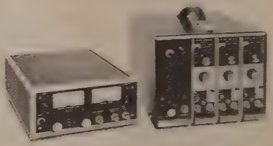


- Computer, Automatic, and Manual Gain Control
- Selectable Frequency Response
- Single–Ended and Differential; Rack Mountable
- Gain Range –10 dB to +80 dB
- Frequence Range 1 Hz to 100 kHz

Hydrophones

- High Sensitivity with Optimum Noise Performance
- Omnidirectional
- All Molded Construction with Built–In Preamp
- Low Sensitivity to Horizontal and Vertical Acceleration
- Frequency Response to Above 100 kHz

Compression-expansion systems



- Record and Recover Wide Dynamic Range Data
- 100 dB Dynamic Range
- Manual, Remote, Computer Controlled Gain
- Compression, Expansion, Normalization

ITHACO also manufactures precision variable electronic filters and lock–in amplifiers. See Sections 2700 and 2900.

ITHACO INC 735 West Clinton Street, Ithaca, New York 14850

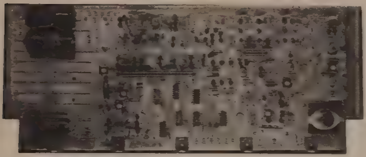
ITHACO

ITHACO Versatility in...

SPECIALIZED DESIGN AND/OR PRODUCTION OF CUSTOM SUBASSEMBLIES TO YOUR REQUIREMENTS

- LOW-NOISE AMPLIFIERS
- ELECTRONIC FILTERS
- VOLTAGE AND COMPUTER CONTROLLED AMPLIFIERS
- COMPRESSION & NORMALIZING AMPLIFIERS
- DIGITAL INTERFACE EQUIPMENT
- QUALITY ASSURANCE TO GOOD COMMERCIAL PRACTICES AND CAPABILITIES TO
  - MIL-I-45208A
  - MIL-Q-9858A



CUSTOM SIGNAL CONDITIONING SYSTEMS

- COMPUTER CONTROLLED, AUTOMATIC OR MANUAL OPERATION
- DESIGNED FOR VIBRATION, ACOUSTICS, OR OTHER AC MEASUREMENTS
- PORTABLE OR RACK AND PANEL CONFIGURATIONS

PRESTON

FLOATING DIFFERENTIAL INSTRUMENTATION AMPLIFIERS

Preston's amplifiers deliver precision many times better than any other amplifier! Our "Balanced Precision" 8300 XWB Series have greatly improved performance to overcome the FOUR major sources of instrumentation amplifier errors!

COMMON MODE REJECTION — Preston's CMR of 150 db at DC and 130 db at 60 Hz reduces errors by a factor of 3 to 10 times over the "next best" amplifier!

TEMPERATURE STABILITY — Preston is 2 to 5 times better with a Gain TC of only 10 ppm/°C and Zero Shift of less than 0.1uV/°C RTI!

PUMPOUT CURRENT — 10 times better! Stays under ½ nanoamp over the entire temperature operating range!

OVERLOAD RECOVERY — 10 times as fast! Recovers to within 0.01% in 30 usec!

The 8300 XWB Series gives you many combinations of ACCURACY, LINEARITY and BANDWIDTH from which to choose, and every model has its own integral power supply and mounts in standard RETMA racks.

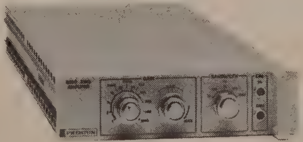
For complete information on the entire line of Preston instrumentation amplifiers, request your copies of our technical literature and our 12 page "Balanced Precision" brochure that shows how to determine the true performance of your instrumentation system.

8300 XWB Series Floating Differential Instrumentation Amplifiers.

Five basic models provide versatility to meet every need, and every model meets all of these performance specifications:

MODEL	A	B	C	D	E
Gain	Ten Steps plus Variable to 2500 X		Ten Steps Fixed to 1000 X		Fixed 1X to 2000 X
Gain Accuracy	±0.01%		±0.1%		±0.01%
Gain Linearity	±0.005%	±0.01%			
Drift (μV/°C)	0.1 μV RTI ±20 μV RTO	0.3 μV RTI ±100 μV RTO			
Bandwidth	Selectable to 100 kHz			Preset up to 100 kHz (max)	

Input Impedance	100 Megohms shunted by less than 0.001 μfd at DC
Input Noise	3 μV (100 kHz bandwidth)
Pumpout Current	Less than 0.2 nanoamps at constant temperature and less than 0.01 nanoamps change/°C
Common Mode Rejection	150 db at DC, 130 db at 60 Hz, 110 db at 400 Hz
Common Mode Voltage	350 Volts maximum peak AC or DC
Bandwidth	DC to 100 kHz
Gain Stability	0.01% (six month term)
Settling Time	30 μsec to within 0.01% of input signal
Long Term Zero Drift	±5 μV RTI, ±1 mV RTO (six month term)
Output Noise	0.2 millivolts peak
Output Capability	±10 volts at 100 ma.

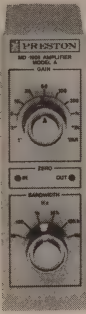


Any of the five models of the 8300 XWB Series Amplifiers can be ordered in this "horizontal" configuration.

PRESTON SCIENTIFIC INCORPORATED 805 East Cerritos Ave., Anaheim, Calif. 92805 Tel : (714) 776-6400 TELEX 65-5321

Instrumentation System Amplifiers
with Programmable Gain and Bandwidth,
Options for Special System Interface,
and Two New Amplifier Instruments.

Programmable Gain and Bandwidth



The Model "A" and "B" versions of the 8300 XWB Series Amplifiers are now available with programmable gain and bandwidth. These remotely controlled amplifiers identified by Model 8300 XWBRC—A and B are ideal for use in instrumentation systems where gain and bandwidth must be rapidly changed to optimize signal amplitude for digitizing purposes and to reduce the RTI noise level by controlling the bandwidth of the output signal.

As many as 10 gain levels between unity and a maximum gain of 2500 can be provided, and up to five different bandwidths in the range from 10 Hz to 100 kHz can also be included —all in the standard amplifier case.

Control of both gain and bandwidth can be accomplished by a 4 bit binary address at standard digital logic levels in fully automated and computer controlled instrumentation systems.

Options for Systems Interfacing.

Where system requirements include special performance features, Preston's instrumentation amplifiers can be delivered with a wide variety of options. For complete information, ask for our 'Amplifier Options' brochure.

1. **Low Pass Filter.** Provides cut-off frequencies as low as 1 Hz.
2. **Four Pole Bessel Filter.** Increases attenuation to 24 db/octave above cut-off frequency.
3. **Dual Output.** For simultaneous use by recorders and indicators.
4. **Triple Output.** For use where the system requires multiple outputs.
5. **Binary Gain Steps.** Eleven steps raise gain from unity to 1024.
6. **Output Coding.** Electrical output signals that indicate gain and bandwidth settings.
7. **Calibrate Relay.** Internal relay switches to 'standard' voltage to periodically calibrate the system.
8. **110 Volt Overload on Input Signal Lines.** Protects amplifier against very high Normal Mode Voltages.
9. **Multiplexer Switch.** External logic signal switches on internal multiplexer circuits for sampling by ADC or digital voltmeter.

New Amplifiers — Available for Delivery in Fall '75

Model AFM Series Amplifier-Filter

Here is a new series of floating differential instrumentation amplifiers specifically designed for use as a high gain or low gain buffer amplifier for real time process control applications or as a pre-amplifier for multiple-channel analog data recorders, strip chart recorders, pen drives and oscillograph galvanometers.

Drift and noise are very low, and accuracy of 0.01% is available over the entire gain range from unity to 2500. Full power bandwidths from DC to 10 kHz is also provided, with a 10 volt p-p output.

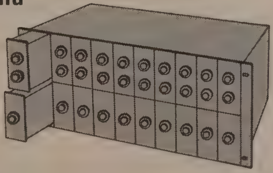
The optional plug-in filter module can be delivered with a customer specified 2, 3, or 4 pole Bessel filter any where in the frequency range from 1 Hz to 10 kHz.

Common Mode Rejection is 150 db at DC, and the maximum Common Mode Voltage is 350 volts peak.

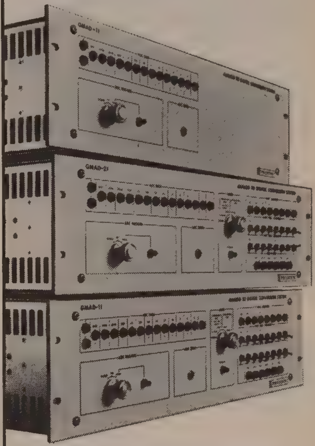
With its smaller size, high performance, unique flexibility and low unit cost, the Model AFM Series Amplifier-Filter is ideal for many analog amplifier applications in research, data acquisition systems and on-line automated production equipment.

1 MHz XWB Series Ultra-Wide-Band Instrumentation Amplifier

A new wide-band amplifier with all the "Balanced Precision" performance of Preston's 8300 XWB Series, but with full power bandwidth of 1 MHz! Designed to meet the growing need for higher frequency response in instrumentation for advanced research and development programs as well as high speed data acquisition systems.



PRESTON Builds the World's Fastest, Most Reliable Analog-to-Digital Converters and Data Acquisition Systems, too!



The GM Series of A-D Conversion Systems includes a full range of resolutions, accuracies and speeds—all the way from 9 bits in 20 usec up to 15 bits in 1 usec!

And every GM Series ADC System can include any type of input amplifier, multiplexers, sample-and-hold amplifiers, and special logic control circuits for custom interfacing with your other data system components.

New Low-Level Amplifier-Multiplexers and Programmable Gain Amplifiers have also been added to the Preston ADC capability, and a full set of plug-in modules that provide a direct interface with your computer is also available.

For more information on the specifications and operating features of these advanced ADCs, look at pages 1•194 and 1•195 of Volume 1 of EEM.

And for information on Preston's data acquisition sub-system components, see the description on pages 1•196 through 1•199 of Volume 1 of EEM.

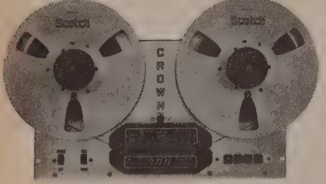
PRESTON

crown TAPE TRANSPORTS



SP-700 TRANSPORT

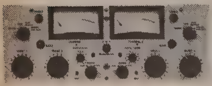
Mechanical interlock mode control • Automatic shut-off in play mode • Hysteresis-synchronous capstan motor • Electro-magnetic braking • 3¾, 7½ ips standard (15 ips optional) • Accepts 10″ NAB reels or 5″ or 7″ EIA reels. Price: $695.

Crown ¼″ magnetic tape transports provide many years of high quality playback and recording for audio recording and test instrumentation. Crown tape machines are three-motor design, and most components are plug-in for easy replacement. Custom design for OEM applications is available. Optional accessories are available for variable speed drive, remote control, multiple microphone inputs. 19″ rack mount. Optional walnut cabinets available. Wow and flutter 0.06% at 15 ips, 0.09% at 7½ ips, 0.18% at 3¾ ips.

SP-800 TRANSPORT

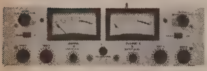
Computer Logic Control for mode selection • Photocell automatic shut-off in all modes • Hysteresis-synchronous capstan motor • Electro-magnetic braking • 3¾, 7½, 15 ips standard • Accepts 10″ reels or 5″ or 7″ EIA reels. Price: $1,095.

crown RECORDER ELECTRONICS



CX SERIES, 2 OR 4 CHANNEL

Plug-in modules for all functions • Built in remote record for no thumps on tape at beginning or end of record mode • Echo controls built in • Front panel bias adjustment • 3-speed equalization • Treble and bass controls with "flat" detent • Available with 600 or 250 ohm balanced 19″ rack mount. Price: $995, 2-channel; $1,995, 4-channel.



SX SERIES, 2 OR 4 CHANNEL

All circuit functions on four permanently mounted printed circuit cards • Record mode interlock • Rear panel bias adjust • Two speed equalization • Simplified circuitry • External balancing transformers available as accessories. 19″ rack mount. Price: $595, 2-channel; $1,495, 4-channel.

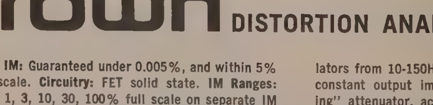
SX MONO

Same as SX • Bridging or 250 ohm balanced rear panel mixing mic inputs • 2 unbalanced mixing line inputs • Balanced and unbalanced line outputs • Headphone output jack. 19″ rack mount. Price: $495.

SP PLAYBACK

SX Type of construction • Play only electronics • 3-speed equalization • Front panel level adjustments • Unbalanced low impedance output • 600 ohm balanced output. 19″ rack mount. Price: $100, 2-channel, $200, 4-channel.

crown VARIABLE SPEED DRIVE



Crown VSD-5A attachment provides pushbutton control for tape transports of 15, 7½, 3¾, 1⅞ and 15/16 ips. Includes variable control to adjust each speed selection +50%, −25%. Adds to series 700 or 800 transports. Includes 19″ rack mount controls with forced air cooling, plus servo-controlled drive system to replace drive motor of transport. **Price:** $850.

crown DISTORTION ANALYZER

Residual IM: Guaranteed under 0.005%, and within 5% of full scale. **Circuitry:** FET solid state. **IM Ranges:** 0.1, 0.3, 1, 3, 10, 30, 100% full scale on separate IM meter. **Sensitivity:** 17mv sensitivity for testing low-level devices; metered, variable LF/HF ratio; internal oscillators 60Hz and 7KHz; provision for external oscillators from 10-150Hz (LF) and 2.5K-20KHz (HF) ranges; constant output impedance. **Plotting:** Master "tracking" attenuator, acting on input and output, permits rapid IM plots of the test device — over a 45db output range in 5db steps. **Price:** $695 rack mount, optional walnut cabinet available.

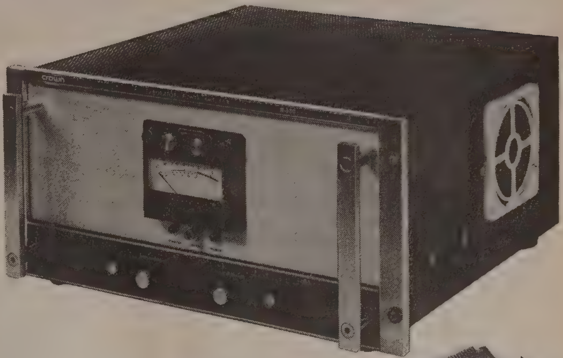
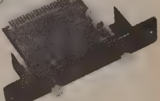
WIDEBAND POWER AMPLIFIERS

crown
M-600
SINGLE CHANNEL AMPLIFIER

Power Bandwidth: +1 −0dB, DC-15KHz at 1,000 VA into 4 ohms, DC-20KHz, 600 VA, 8 ohms, maximum power at 2.5 ohms. **IM Distortion:** Under 0.05% from 0.01 VA to 600 VA. **Frequency Response:** ±1dB DC-100KHz at 1 VA into 8 ohms. **Phase Response:** +0° −15°DC-20KHz. **Hum and Noise:** 120dB below full output (20Hz-20KHz). **Slewing Rate:** 16v per micro-second. **DC Output:** 20A MAX at 100v. **Harmonic Distortion:** Less than 0.001% from 20Hz-400Hz, and increasing linearly to 0.05% at 600 VA into 8 ohms. **Output Impedance:** 5.5 milliohms in series with 2.5 μhy, both shunted by 2.7 ohms in parallel with 1 mfd. Safely drives any load including completely reactive loads. **Voltage Gain:** 20 ±1% (26dB) at std. input with gain control fully CW. **Amplifier Output Protection:** Short — mismatch — and open circuit-proof. **Overall Protection:** High line voltage or over temperature results in shutdown of the high power supplies, each of which is fused. Controlled-slewing rate voltage amplifiers protect the amplifier against RF burnouts. Input overload protection is furnished by a resistor at the input of the amplifier to limit current. **Heat Sinking:** A self-contained, forced-air cooling system having a 1900W cooling capacity in 25°C air is employed with a two-speed fan to minimize noise output and dust loading of the input filter at times of low dissipation. **Output Indicator:** Calibrated peak voltage output meter with adjustable hi-lo indicator lights. **Inputs:** Wide choice of input configurations using plug-in modules. **Weight:** 92 lbs.**Dimensions:** 19″ w x 19″ d x 8¾″ h. **Price:** $1,695 rack mount.



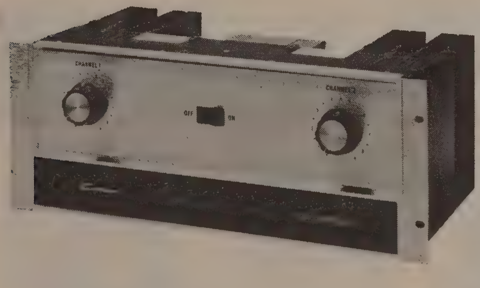


M2000
SINGLE CHANNEL AMPLIFIER

(Not shown, results from the coupling of two M-600 units together through a socket provided on the back of each.)

Power Bandwidth: +1dB-0dB DC-15KHz at 2,000 VA into 8 ohms. Other specifications similar to model M-600. **Weight:** 200 lbs. **Dimensions:** 19″ w x 17½″ h x 19″ d. **Price:** $3,390 rack mount.

crown
DC300A
DUAL-CHANNEL POWER AMPLIFIER



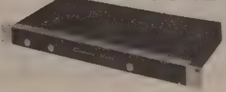
Power Bandwidth: +1dB-0dB, DC-20KHz at 155 VA each channel, 8 ohms. **Bridge Output:** +1dB DC-20KHz at 310 VA, 16 ohms. **IM Distortion:** Under 0.05%, .25 VA to 155 VA, 8 ohms. **Frequency Response:** ±1dB, DC-100KHz 1 VA. **Phase Response:** +0°, −15° DC to 20KHz at 1 VA. **Hum and Noise:** 110dB below 155 VA. **Output Impedance:** Less than 7 milliohms in series with less than 3 microhenries. **Slewing Rate:** 8v per micro-second. **DC Drift:** Under 3mv to 55°C. **Weight:** 55 lbs. **Dimensions:** 19″ w x 9¾″ d x 7″ h. **Price:** $799 rack mount.

crown
D150
DUAL-CHANNEL POWER AMPLIFIER

crown D150A

Power Bandwidth: +1dB-0dB, DC-20KHz at 80 VA, 8 ohms. **Bridge Output:** +1dB-0dB, DC-20KHz at 160 VA, 16 ohms. **IM Distortion:** Under 0.05%, .25 VA to 80 VA, 8 ohms. **Frequency Response:** ±1dB, DC-100KHz 1 VA. **Phase Response:** +0°, −15° DC to 20KHz at 1 VA. **Hum and Noise:** 110dB below 80 VA. **Output Impedance:** Less than 15 milliohms in series with less than 3 microhenries. **Slewing Rate:** 6v per micro-second. **DC Drift:** Under 3mv to 55°C. **Weight:** 24 lbs. **Dimensions:** 17″ w x 9″ d x 5¼″ h. **Price:** $459 rack mount.

crown
D60
DUAL-CHANNEL POWER AMPLIFIER



Power Bandwidth: +1dB-0dB, 35Hz-15KHz at 30 VA, 8 ohms. **Bridge Output:** +1dB-0dB, 20Hz-15KHz at 60 VA, 16 ohms. **IM Distortion:** Under 0.05%, .25 VA to 30 VA, 8 ohms. **Frequency Response:** ±1.2dB 5Hz-100KHz at 1 VA into 8 ohms. **Phase Response:** +10°, −15°, 20Hz-20KHz at 1 VA. **Hum and Noise:** 106dB below 30 VA. **Output Impedance:** Less than 15 milliohms in series with 3 microhenries. **Slewing Rate:** 6v per micro-second. **Voltage Gain:** 20.6 dB. **Weight:** 10 lbs. **Dimensions:** 19″ w x 9¾″ d x 7″ h. **Price:** $269 rack mount.

DESIGN & MANUFACTURING CAPABILITIES

Since 1959 IEM, with the same personnel at the same location, and with the same management, has been producing Magnetic Recording Equipment and components for the Industry. It is highly probable that in 1991 we will still be here to serve you! In these uncertain times this type of stability is worth thinking about . . .

OVER 100,000 STRONG

Every month over 100,000 buyers and specifiers like yourself receive Electronic Products Magazine . . . that makes us the largest electronics magazine around. And we're the largest for a darn good reason . . . we give you what you need: a practical editorial approach . . . one that's application and new product oriented. Editorial that offers solutions to the problems you face in your everyday task of designing and building electronic systems and subassemblies. The type of information you can put to use now.

If you're not getting EPM . . . why not write our circulation manager for a qualification form and join the over 100,000 strong.

Cartridge and cassette recording heads

The Inter-Technical Group markets for Magnetic Components Limited, Britain's leading manufacturer of high quality audio recording heads. We offer a range of both mono and stereo heads for use in both cartridge and cassette tape recorders as well as a selection of reel to reel heads.

All MC heads are compatible with existing equipment produced throughout the world.

We will be glad to send you specification sheets and prices if you will tell us the categories in which you are interested.

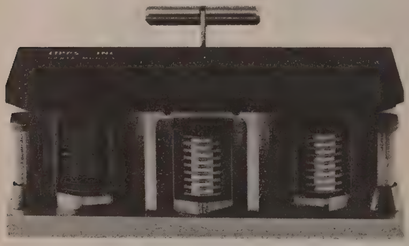
LIPPS..INC MAGNETIC RECORDING HEADS

PROFESSIONAL AUDIO RECORDING HEADS

Illustrated above are only a few of the heads which we produce. Contact us direct for more information and data.



PRE-ALIGNED HEAD ASSEMBLIES

LIPPS . . INC
offers a variety of precision-made head assemblies, complete and ready to mount on your transport. Renew your existing equipment for finer reproduction quality, or update older equipment to accommodate the newer multi-channel recording techniques.

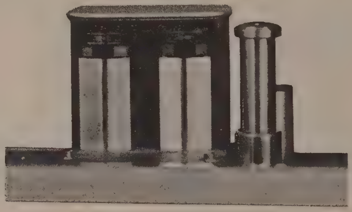
REFURBISHMENT · RELAPPING REPLACEMENT SERVICE

AUDIO · ANALOG · DIGITAL INSTRUMENTATION

Enjoy maximum usage for a fraction of the original cost. Utilize our reconditioning service to obtain maximum use of existing heads.

We will be pleased to furnish prices for special assemblies, including ANALOG and DIGITAL, on request.

LIPPS . . INC. manufactures a complete line of monaural, stereo and multichannel heads for replacement of original heads in name-brand recorders. Our heads are guaranteed to equal or exceed the requirements of original equipment.



LIPPS . . INC. maintains a complete relapping and replacement service for Ampex and RCA Video Tape Recorder Audio Heads.

Most assemblies are serviced in three to five working days.

LIPPS . . INC. is the oldest independent head manufacturer in the United States. We are a production-oriented facility with engineering and development capabilities that enable us to produce metal surfaced and ferrite heads. LIPPS . . INC. produces a complete line of high quality recording heads, mainly for Original Equipment Manufacturers.

Successful performance with Original Equipment Manufacturers has come about as the result of a flexible and strong capacity to produce to customer specifications at competitive prices. Close cooperation between your engineering department and our production staff is our basic policy as an independent manufacturer. Our unique methods have always enabled us to furnish top quality, precision products to our customers at prices more attractive than our competitors. Our techniques are of proprietary design and, therefore, are controlled and protected by in-house processes, some of which are:

> Photolab . . . chemical milling . . . hydrogen annealing . . . transfer molding . . . vacuum depositing . . . complete capability to machine, profile, slice and polish ferrite and ceramic materials . . . complete in-house machine shop.

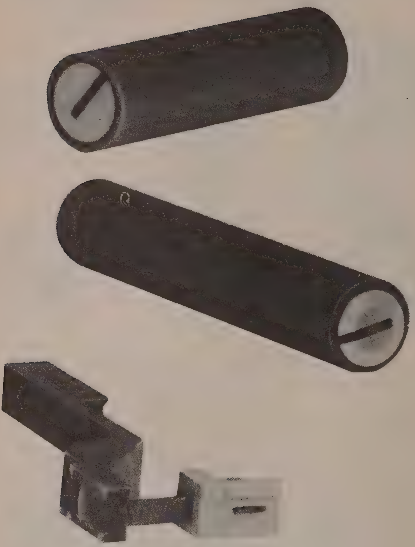
We are manufacturers of custom heads designed for individual requirements. Your specifications will receive immediate attention when sent to us for quotation, and our engineering staff is always available to assist in any way.

We look forward to having the opportunity to manufacture a product built to your exacting requirements at a competitive price.

Robert J. Cross
Vice President and General Manager

LIPPS..INC MAGNETIC RECORDING HEADS

COMMERCIAL AND MILITARY TYPE DRUM HEADS



Fixed and flying drum heads for read and write operations, low and high frequency. Designed specifically for new and direct replacement requirements for drums of six inch to eighteen inch diameter and typical rotational speeds of 1800 RPM and more.

DIGITAL READ/WRITE HEADS FOR CASSETTE & CARTRIDGE

LIPPS . . Incorporated manufactures a complete line of digital single gap read/write heads and dual gap read after write heads for cassette and cartridge application. With single and multi-channel configurations for .150 inch cassette format and ¼ inch format.
Data rates range to 3200 FRPI at tape speeds of up to 50 IPS.

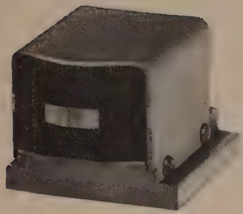
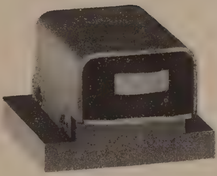
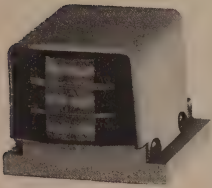
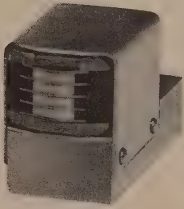
OVER 25 YEARS OF EXCELLENCE IN MAGNETIC HEADS

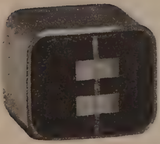
CREDIT CARD READ AND READ/WRITE HEADS







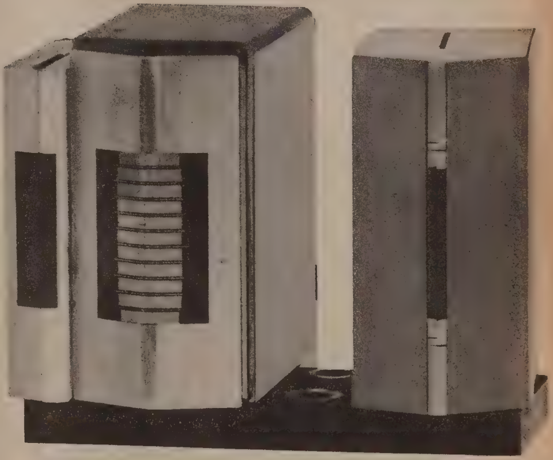




Magnetic stripe card and ticket read and read/write heads with specifications which meets IATA, ANSI, and ABA requirements. These single and multi-track magnetic heads have proven themselves in thousands of hours of actual operation and in measured control tests. The life factor ranks as one of the highest in practical use today. Typical data rates are above 400 FRPI at 15 IPS card speed.

MAGNETIC TAPE CERTIFIERS

LIPPS.. Incorporated has developed a complete line of magnetic tape certifier head assemblies. These assemblies are composed of a full width write head, a multitrack read head and a full width erase head. These designs of certifier head assemblies will accommodate tape speeds above 200 IPS. Applications include certification of tapes for video, computer, and instrumentation (IRIG). Tape width capability ranges from ½ to 2 inch.



If you're having problems in your current head program contact us, we may have the answer.

We appreciate the opportunity to be of service to you and assure you of a prompt reply to your specifications and assistance with problems.

Robert J. Cross
Vice President and General Manager

SONALERT® Electronic Audible Signals

GENERAL SPECIFICATIONS AND NOTES

Mallory Sonalert® audible signals produce a unique tone by electronic means. Within the Mallory line of Sonalert® signals, there are three distinctive tone frequencies available. These tones have been selected for their penetrating sound even in the presence of high background noise, yet they are not irritating in a quiet environment.

The Sonalert® signal is ideally suited for portable battery operated equipment because very little electrical power is needed to produce the tone. The low power feature allows the Sonalert® signal to be turned on and off with a low power transistor, S.C.R. or integrated circuit. Construction is completely solid state with no moving parts, no arcing, no R.F. noise and no mechanical wear. For additional information request Bulletin 4-10-02.

EXPLANATION OF "NOTES" COLUMN ON PRECEEDING PAGE.

OPERATING VOLTAGE

Twenty-eight Sonalert® models are available for operation from 1 to 250 VDC and 6 to 250 VAC, 50-400 Hz. Sound starts upon application of voltage and stops when voltage is disconnected.

Note A: Designates models which operate on both AC and DC voltage. These models are non- polar.

SOUND LEVEL

Sound level will vary with applied voltages and is measured as follows:

1. Measurement to be taken only when Sonalert® is emitting sound. This includes pulsing and warbler models.
2. Measured at two (2) feet, free field, not mounted.
3. Measured on "A-Scale" sound level meter: Zero dB = .0002 dynes/CM².

SOUND FREQUENCY

Three sound frequencies are available depending upon model selected. Frequency is fixed for each model and cannot be altered by external means. Standard tolerance is ±500 Hz. Special tolerance for telephone compatibility is +500 −100 Hz on 2900 Hz models only. To specify special tolerance, add "T" after last letter of model number. Example: SC628APT.

PULSING MODELS

Note B: Designates pulsing models which automatically turn off and on at a rate of 2 to 9 Hz depending upon applied voltage.

WARBLER UNIT

Note C: Warbler Model SC628W is to be used with SC628, SC628H, SNP428 to produce two tones alternating at a rate of 2 to 9 Hz depending upon voltage.

MOUNTING METHODS

Note D: Terminals — .032 steel, tin plated with .093 dia. wire hole, will accept standard 3/16" quick disconnect.

Note E: Terminals — .016 brass, hot tin finish with .076 wire hold. Terminal will accept standard ⅛" disconnect.

Note F: Terminals — .032 brass, tin plated, tapped for #6-32 screw. Two #6-32 cadmium or zinc plated steel screws included. Will accept standard ¼" quick disconnect.

INDUSTRY LISTINGS

Note G: Listed as recognized component — Audible Signal Appliances by Underwriters Laboratories Guide Number UCST2, yellow card number S1290.

Note H: Federal Stock Numbers Issued as follows:

Model No.	Federal Stock No.
SC628H	5820 134 5372
SC628P	6350 071 2492
SC628A	6350 912 6310

Note I: Military versions are available which use MIL approved components where applicable. Test documentation is provided. Black anodized aluminum nut is included standard. Olive drab plastic case and olive drab anodized aluminum nut available if specified. Request "Specification for Mallory Sonalert® Signal Military Version" for more information. To specify Military version, add "M" after last digit in part number. Example: SC628MP.

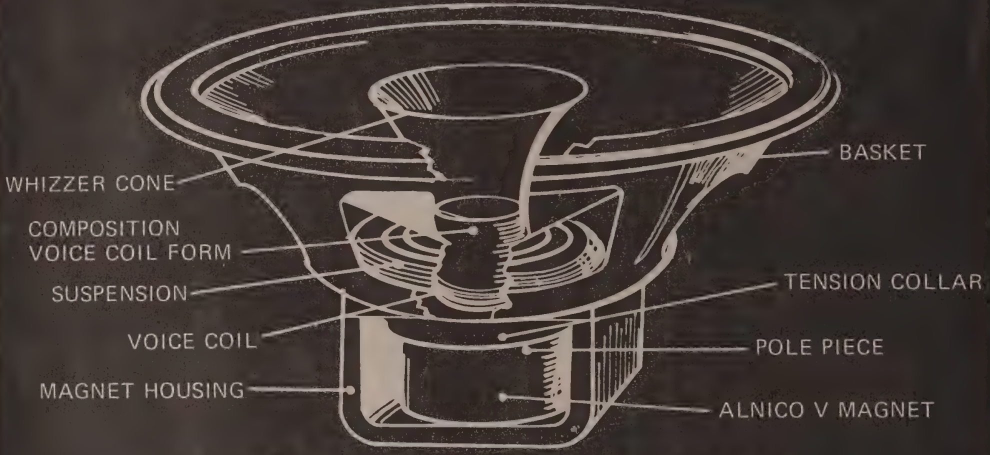
If you can see how to improve this speaker...



we're looking for you.

We're serious.
If you're interested enough in speakers to want to try to improve them, we want to do business with you—because we feel the way you do.

LOOK FOR A BETTER WAY.
Sure, there are ways to improve any speaker—if the sky's the limit on time, size, and cost. But there's the challenge: boost quality and performance, yet stay within design and cost requirements.

THAT'S THE KIND OF CHALLENGE WE LIKE BEST.
That's why we think that the best way to improve the speaker above is to give it an aluminum voice coil form. Why? Low-mass, better heat-resistance, totally moisture-proof. Superior to composition forms in every way.

WE MAKE ALL OUR SPEAKERS THAT WAY.
Whether you order one of more than 160 Oaktron speakers from inventory, or if Oaktron designs and engineers a speaker to your specifications, you'll get the aluminum voice coil form.

The aluminum voice coil form. After more than 20 years in the business of solving speaker problems and almost 60 million speakers, we know it's the best. And we guarantee it.

GUARANTEE: All OAKTRON speakers are 100% inspected and tested and are guaranteed against defects of materials and workmanship for one year from date of purchase, when installed and operated within design specifications. Replacement will be made at no cost when returned to OAKTRON INDUSTRIES, INC.

People looking for these speaker applications...

HI FI COMPONENTS • TRANSDUCERS • EXPLOSION & FLAME PROOF • DETECTORS • PUBLIC ADDRESS • WEATHERPROOF • REPLACEMENT • UNDERWATER • DRIVERS • COAXIAL • OPTICAL SCANNERS • INTERCOM • DEPTH SOUNDERS • SYSTEMS • NOISE MASKING • SUBMERGENCE PROOF • ALARM • METAL LOCATORS • HANDI-TALKIES • FREE EDGE • FUNGUS RESISTANT • TWIN CONE • WARNING SYSTEM

looked to us last year.

Oaktron will build any speaker within these design and production capabilities.

SPEAKER SIZES: 1¾″ to 15″ diameter, in round, square, pin-cushion, rectangular and special shapes to design specifications.

VOICE COILS: 5/16″ to 2″ diameter; all wound on heat-dissipating, moisture-proof aluminum forms.

VOICE COIL LAYERS: 2 to 6, single or dual windings.

IMPEDANCE: 1.5 to 200 ohms, or any impedance as specified; multi-impedance taps.

CONNECTORS: Screw post, spade lug, solder eye, or as specified.

ALNICO V MAGNETS: 0.18 oz. to 20.0 oz., in yoke and/or high-energy cup housings.

CERAMIC MAGNETS: 2.35 oz. to 32 oz. Barium ferrite; single and stacked mountings with extended pole piece.

POWER CAPACITIES: ½ to 100 watts, true RMS ratings; 150% transient peak.

CONE MATERIALS: Paper, acrylic or phenolic impregnated cloth, aluminum; moisture-resistant, weather-proof, fire-retardant, and fungus-resistant treatments.

CONE CONSTRUCTION: Butyl rubber, foam rubber, and cloth free-edge surrounds; ½ roll up or down, multiple roll edge; molded, seamed, ribbed, curvilinear, deep, shallow, twin-cone "whizzer."

FREE AIR RESONANCE: Designed to specifications.

BASKETS: Precision formed steel, electrostatically coated in standard and special design shapes: shallow, deep-draw, perforated, solid back; with and without mounting holes and transformer emboss. Front and rear mounting with vinyl gasket ring, clip fasteners.

ENTERTAINMENT SPEAKERS: High response twin-cone, free-edge, musical instrument, woofers, tweeters, mid-range, color TV, co-axial, weather-proof patio speakers; three-way systems; automotive stereo, multi-impedance, and dual voice coil; general and automotive replacement; GM, Ford, and tractor type.

UNDERWATER SPEAKERS: Designed to specifications for deep-submergence, reactive measurement, and underwater communications.

TRANSDUCERS: Displacement, force, pressure, ultrasonic, velocity, and vibration types to design specifications for scientific measurement or continuous use; in sizes and shapes as specified; drivers.

ARCHITECTURAL SOUND: Noise masking, music, paging, public address, dual voice coil, intercom, alarm; interior, exterior, waterproof, weather-and-fungus-resistant, explosion- or flame-proof; architectural enclosures.

ACCESSORIES: Baffles, L-pads, transformers, ceiling rings, mounting brackets.

ALL SPEAKERS MADE IN THE UNITED STATES.

The "T" attenuator circuit provides the features of zero insertion loss (1:1 impedance ratio) and constant input and output impedance for all steps. This device is used in test equipment and for extending the range of volume indicating meters. The Balanced "H" circuit is obtained by ganging together two "T" circuits. Resistor Accuracy: ±5% Standard, ±1% Precision. Cueing available. Specify impedance desired.

Primo —Leader in the Microphone Field—

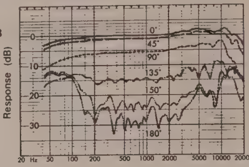
FOR PROFESSIONAL USE MICROPHONE

STUDIO CONDENSER MICROPHONE CMU-503

Professional in every way, the CMU-503 will meet most rigorous studio, broadcast and high-quality PA applications. Self-contained preamp combined with unique circuitry and a high voltage generator, provides such superior characteristics as low 20dB self-noise and 140dB maximum input.

Separate power supply includes level attenuation switch, low frequency response switch, front panel battery removal and battery check.

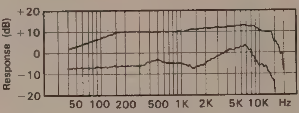
- Frequency Response: 20—18,000 Hz, ±2.5 dB
- Output Impedance: 200 ohms (±15% @ 1,000 Hz)
- Output Level: −72 dB ±1.5 dB

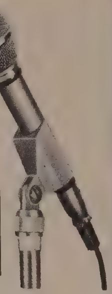


STUDIO UNIDIRECTIONAL DYNAMIC MICROPHONE P-88

Dynamic cardioid microphone designed for studio and broadcast applications. Meets the most stringent PA requirements. Light weight and small size make it the ideal hand-held entertainment microphone. Multiscreen and foam windscreen eliminate wind noise and breath blast. Special smooth finish and unique cable connector reduce mechanical noise considerably. Cardioid cartridges are precision adjusted.

- Frequency Response: 50—15,000 Hz
- Output Impedance: 250 ohms balanced
- Output Level: −76 dB ±3 dB (0 dB = 1 V per microbar)



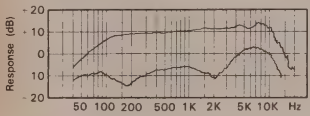


FOR SEMI PROFESSIONAL USE MICROPHONE

UNIDIRECTIONAL DYNAMIC MICROPHONE UD-876M

High quality cardioid dynamic microphone ideally suited for professional vocal, stage and entertainment work. With effective windscreen and breath blast filter. Excellent cardioid pattern reduces unwanted sound pickup from the rear and controls feedback. Convenient built in "ON-OFF". Uses a quality 3-pin standard cable connector.

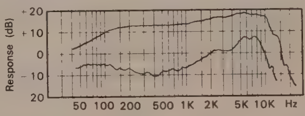
- Frequency Response: 70—14,000 Hz
- Output Impedance: 250 ohms balanced
- Output Level: −76 dB ±3 dB (0 dB = 1 V per microbar)



UNIDIRECTIONAL DYNAMIC MICROPHONE UD-959

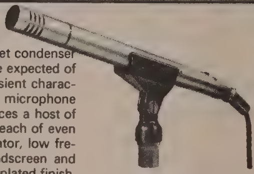
Professional quality vocal and entertainment microphone with a beautiful smooth metal body to reduce handling noise. Extended response is crisp and clean, complimenting any entertainer. Effective built-in windscreen eliminates breaths and wind noise. This rugged performer is designed to withstand the most rigorous entertainment usage.

- Frequency Response: 100—14,000 Hz
- Output Impedance: 250 ohms
- Output Level: −76 dB ±3 dB (0 dB = 1 V per microbar)



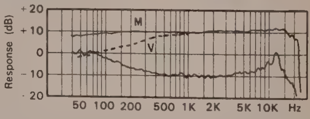
UNIDIRECTIONAL ELECTRET MICROPHONE

EMU-4520

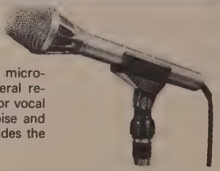


Professional studio and broadcast Electret condenser microphone with the ultrawide response expected of condenser microphones. Excellent transient characteristics make it an ideal studio music microphone for use on all types of instruments. Places a host of professional features with in the price reach of even the smallest studio. With 10dB attenuator, low frequency roll-off switch, removable windscreen and sturdy metal case with smooth long life plated finish.

- Frequency Response: 50—15,000 Hz
- Output Impedance: 200 ohms balanced
- Output Level: −76 dB ±2.5 dB (0 dB = 1 V per microbar)



EMU-4516



A good quality cardioid Electret condenser microphone designed for music pickup and general recording. Built-in low frequency roll-switch for vocal use. Effective windscreen reduces wind noise and breath blasts. This excellent performer provides the "condenser" sound at a low price.

- Frequency Response: 70—13,000 Hz
- Output Impedance: 200 ohms
- Output Level: −77 dB ±3 dB (0 dB = 1 V per microbar)

8" 2-Way Speaker System

utah high fidelity speaker systems

UTAH ELECTRONICS
HUNTINGTON, INDIANA 46750

Utah's complete line of high fidelity speaker systems offer a wide variety of designs, cabinet sizes and styles. Perfectly matched speaker components produce solid bass performance and distinct highs. Plus, the use of advanced materials and existing manufacturing techniques, combined with expert craftsmanship, enable Utah speakers to recreate any musical experience with extreme accuracy.

HS4-B

utah cascade high fidelity speakers

UTAH ELECTRONICS
HUNTINGTON, INDIANA 46750

This series of full-range and woofer models is specially designed for natural sound in custom-built systems. The powerful, flat response of the Cascade series is the result of continuous engineering research and development. Large magnet assemblies and voice coils are featured for high efficiency, power and response. And chemically treated woven fabric suspension maintains high cone compliance.

Finished in baked-on enamel, these high fidelity replacement speakers include magnet covers, separate treated high frequency cones and finger-tip terminals.

utah trusonic series products

UTAH ELECTRONICS
HUNTINGTON, INDIANA 46750

The result of years of research and testing, Trusonic speakers are designed to provide clean natural sound. Sand cast magnet structures add as much as 50% flux density compared to conventional assemblies. Mating surfaces are ground for excellent magnet contact resulting in near zero reluctance. And extra-thick, die cast aluminum frames give lasting precision.

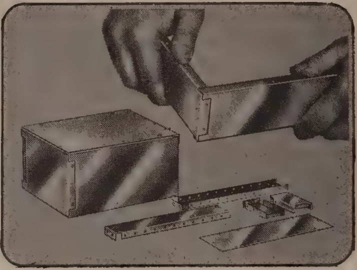
SEEZAK

alpha

THE IDEAL CHASSIS SYSTEM FOR PROTOTYPE AND SHORT RUN APPLICATION

A universal chassis system that offers more than 500 different chassis sizes from a small basic inventory of side rails and panels. All parts of same height are completely interchangeable.

- Easier to work — all mounting can be done from flat panel.
- Complete versatility — all parts of same height, completely interchangeable.
- 10% the storage area of pre-assembled chassis.
- Re-usable.
- Stronger than conventional chassis — heavy gauge aluminum-reinforced covers.



Instead of conventional bulky, difficult-to-work, pre-assembled welded chassis, the SEEZAK system consists of individual front and side rails, and a flat top panel, with optional matching bottom plates and terminal boards.

By means of the patented locking device rails snap together to form a sturdy chassis frame.

The top panel may be firmly fastened to the rails after fabrication, by self-tapping screws (supplied) through the pre-drilled mounting holes on the rails and panel.

Specially designed Phenolic, Fiberglass and Epoxy Glass boards and terminals for SEEZAK chassis available from stock.

CHASSIS PARTS LIST
(For Inventory & Replacement)

To take advantage of the flexibility of the SEEZAK system, order the interchangeable parts on this page to build your chassis inventory.

HOW TO ORDER:
To order parts for a chassis 4″ in width, 7″ in length and 2″ in height, order the following:
1 pr. rails — 2″ high x 4″ wide (R24)
1 pr. rails — 2″ high x 7″ long (R27)
1 panel — 4″ wide x 7″ long (P47)

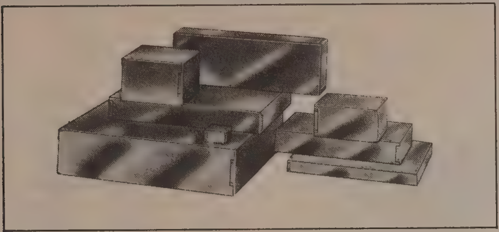
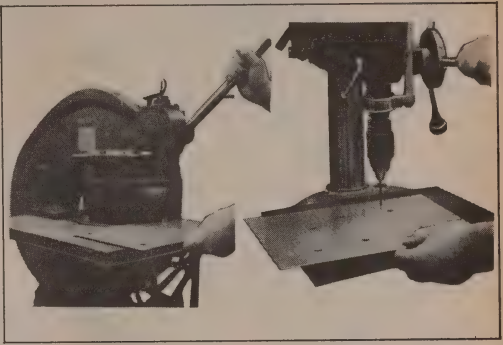
SeeZak chassis from alpha

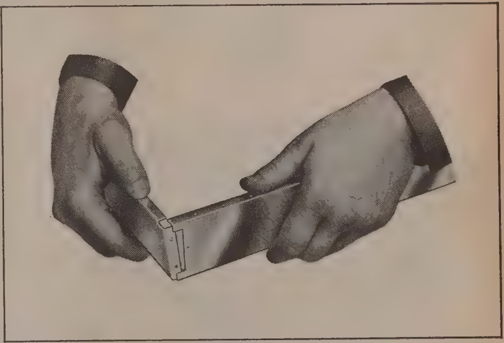
First engineered chassis system designed for prototype and short-run use.

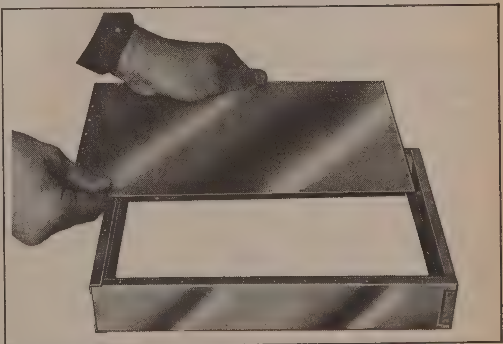


The industry's most complete line of aluminum chassis. 510 sizes from 2" x 2" x 1" to 17" x 17" x 4". Each chassis consists of 4 side rails, matching top paneling and mounting screws. Utilizing the patented SeeZak® chassis locking device.

The many outstanding features of the SeeZak chassis have led to its widespread use in breadboarding, prototype design, and short-run production by leading electronic, aerospace and industrial organizations.







1. EASY TO HOLE-PUNCH, DRILL OR FABRICATE TOP PANEL
It's so much faster and easier to work with a flat panel compared to a bulky, hard-to-fasten-down pre-assembled chassis.

2. CUTS DOWN THE HIGH COST OF ERRORS AND WASTE
Assures accurate chassis layouts.

Hole drilled in wrong position? Last minute layout change? No need to discard a costly complete chassis—simply substitute new top panel. Rails can be reused over and over again.

Drilling and hole punching on flat plate eliminates "oval mounting hole" problem, tool slippage, and errors caused by difficulties in drill and punch positioning.

3. COMPLETE CHASSIS VERSATILITY
A truly universal chassis system, that offers more than 500 different chassis sizes from a small inventory. All parts, of the same height, are completely interchangeable.

For example, two SeeZak chassis frames, a 3" x 6" x 2" and a 4" x 7" x 2" when taken apart, can be recombined to form 6 other chassis frames (3"x4"x2" — 3"x6"x2" — 3"x7"x2" — 4"x6"x2" — 6"x7"x2").

4. SAVES SPACE
Compared to bulky, conventional pre-assembled chassis, takes only 10% the storage area. A complete SeeZak inventory that gives you the parts for 44 chassis can fit into a desk drawer.

5. 510 CHASSIS SIZES
SeeZak offers the largest assortment of chassis and enclosures, plates and panels available—plus a line of matching terminal boards, and specially engineered terminals.

6. REUSABLE—SAVES MONEY
The same chassis rails can be reused over and over again. Simply add inexpensive replacement top panels.

7. STRONGER THAN CONVENTIONAL CHASSIS
Heavy gauge aluminum panels and rails, flanged side rails, reinforced corners, screw-down top and bottom panels, combined to make the SeeZak chassis sturdier and stronger than the conventional welded sheet metal chassis.

8. REPLACEMENT PANELS, CHASSIS, AND TERMINAL BOARDS AVAILABLE
Instead of the conventional bulky, difficult to work, pre-assembled welded chassis, the SeeZak system consists of individual front and side rails, a flat top panel, with optional matching bottom plates and terminal boards.

By means of the patented locking device, rails snap together to form a sturdy chassis frame.

The top panel may be firmly fastened to the rails after fabrication by self-tapping screws (supplied through the pre-drilled mounting holes on the rails and panel).

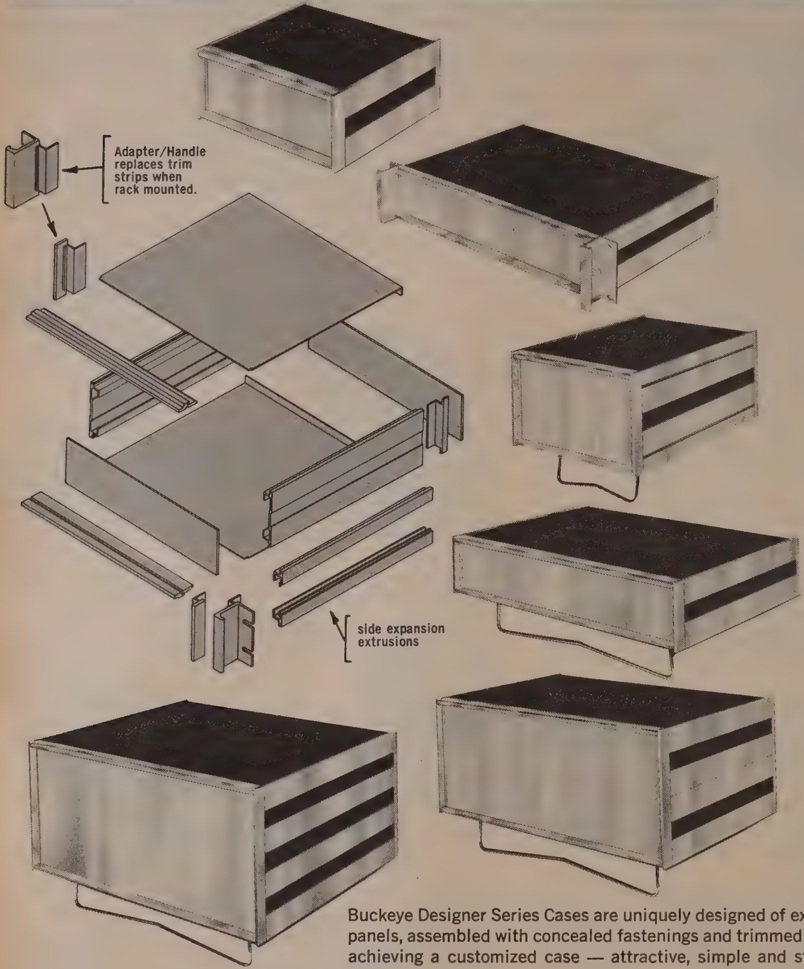
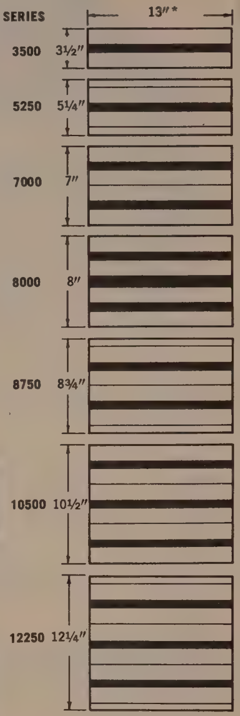
Buckeye DESIGNER SERIES CASES



Adapter/Handle replaces trim strips when rack mounted.
side expansion extrusions



*20″ depth available on 17″ wide cases with no set-up charge.

Buckeye Designer Series Cases are uniquely designed of extruded aluminum shapes and panels, assembled with concealed fastenings and trimmed with suede-type color finishes, achieving a customized case — attractive, simple and strong — at off-the-shelf cost.

EXTERIOR ACCESSORIES

BAILS

RETRACTABLE TILT STANDS

Case Width	Bail Size	Part No.
5.70	3½″	MP 40008-7
8.54	6″	MP 40008-8
11.37	8″	MP 40008-9
17.04	14″	MP 40008-10

The Buckeye Self-Locking Bail adds extra convenience, completeness and decorative appearance to your instruments. Bright chrome finished 3⁄16″ gracefully curved rod comes complete with four molded feet. The two durable nylon front feet are uniquely designed to snap-lock bail into either a fold-away or elevated position.

RACK MOUNT

RACK ADAPTER AND HANDLE EXTRUSIONS

For Case Model	Part No.

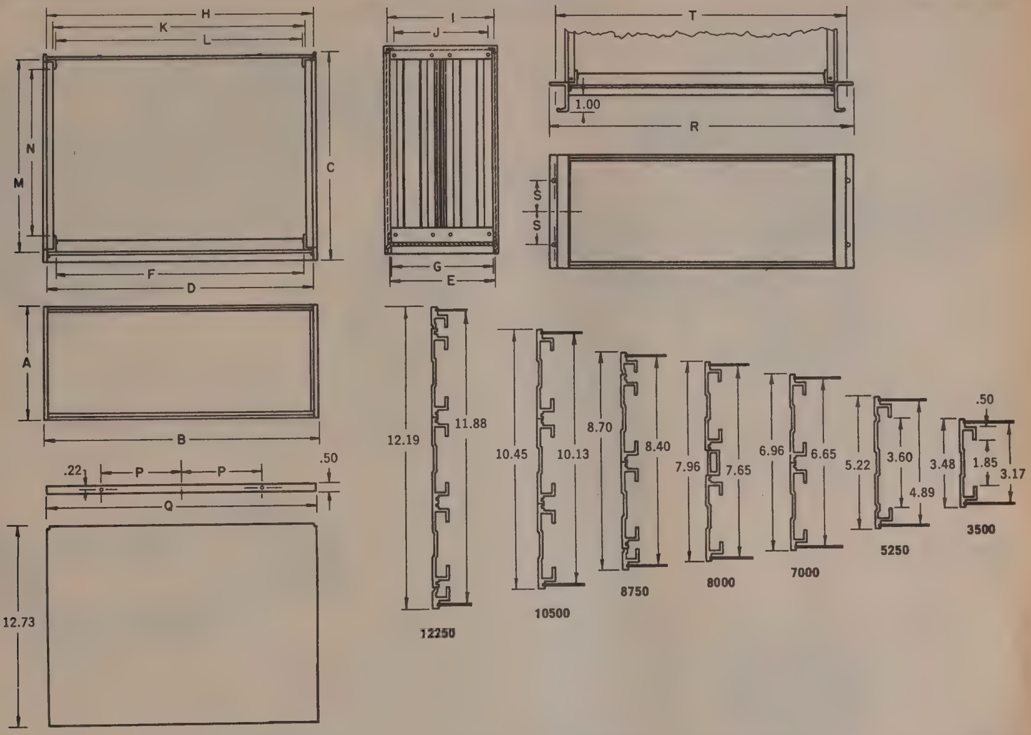
Buckeye



Buckeye Cases are designed in industry standard as well as special heights. Stock sizes available are shown in the chart at right. The engineered design excellence of this series permits depth variation, as an option, and an extremely broad range of case sizes to achieve a customized enclosure with standard components.

Buckeye Cases are strong, yet simply constructed with concealed fastenings — attractive, with anodized satin aluminum and colorful suede-finish trim, yet functional for the most sophisticated electronic equipment. Specialized chassis fabrication, piercing and silk-screening can be provided upon request.

Buckeye also manufactures: quality instrument knobs, racks, PCB modular guides, retractable tilt stands and other styles of enclosures.

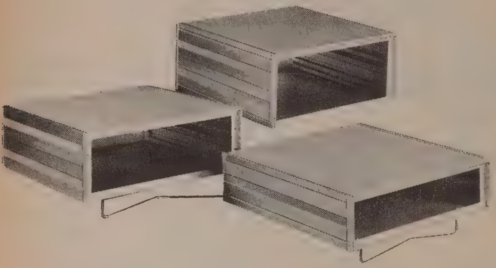
"Quality Products Since 1902"

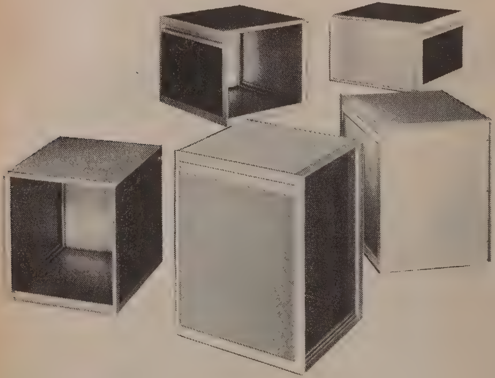
Buckeye ENCLOSURES

FRONT-LOADING CASES



Decorative 19″ cases to house existing instruments in custom fashion at off-the-shelf cabinet cost. Stock units in five sizes from 5¼″ to 12¼″. Durable anodized aluminum trimmed with suede-finish colors. Each case complete with four nylon feet and retractable, self-locking tilt-stand.

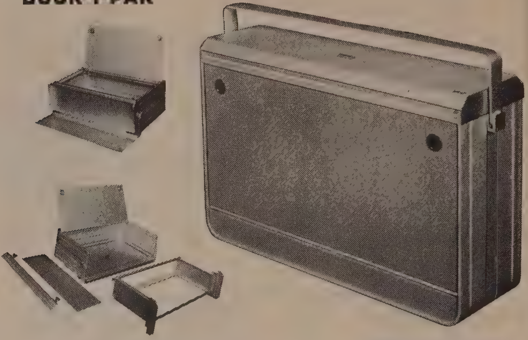
CABINETS



Newest professional - look for instrument enclosures. The strength of the anodized aluminum extrusions and colorful suede-finish panel construction meet the rigid standards to which Buckeye has adhered since 1902.

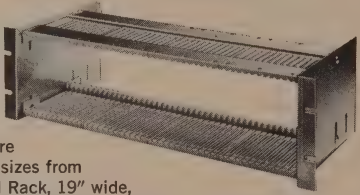
Universal 19″ front panels, with heights 12.25″ to 28″, give packaging versatility at a budget price. All models have integral handles, extrusions with thread-tracks, to mount braces and brackets, and easy access back panels. Slip-in front panel or open-front models available from stock.

BUCK-I-PAK



The first truly portable instrument case designed for travel. Removable chassis for assembly line component installation. Hinged control cover and handle fold neatly underneath. Top access panel opened by flush mounted pushbuttons. Extruded aluminum design with suede-finish colors.
11½″ h. x 18″ w. x 5¼″ d.

RACKS



The popular Buckeye Racks are available in four sizes from the standard Full Rack, 19″ wide, which accommodates four sets of guides, to the ¼ rack incorporating one set of either 4½″ or 6″ guides. The racks are designed of aluminum support bars connected to flanged end plates to facilitate stacking or mounting into stationary systems. To give maximum versatility, end plates have adjustment slots to accommodate board widths of 2¼″ to 4¾″. A non-adjustable ¼ rack for standard 22 pin edge-type connectors is also available as a stock item.

GUIDES

Buckeye Bord-pak Guides are vented ABS modules with uniquely designed alignment studs on mounting shelf and clamp to provide you with the best time and labor-saving innovation ever offered for packaging modular circuitry. All models have simplified connector assembly feature and are available for 4½″ or 6″ board lengths spaced either .437 or .500 for maximum ventilation.

c Ensemble No. 6
Amco Colors Red and Dark Blue with Black Vinyl Inlay.

d Ensemble No. 31
Amco Colors Chutney and Russet with Walnut Vinyl Inlay.

e Represents a close reproduction of Amco's basic standard colors. There are over 125 professionally developed combinations in Catalog 310-A to assist you in your selection . . . presented in true color reproduction.

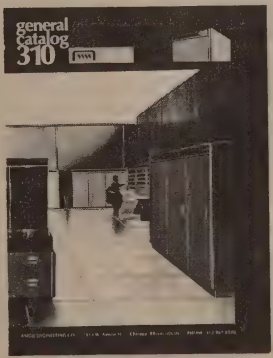
a This Semi-Custom frame is shown utilizing Interface 33 Ensemble 22. Captions b, c & d picture 3 additional variations of Interface 33. Amco Colors Gold and Earth Brown with Brown Leather Vinyl Trim Inlay.

Unprecedented Styling & Versatility

Interface 33—A system of professionally coordinated styling, developed around Amco's basic Modular Frames. These frames being structurally independent of exterior surfaces permitted the accomplishment of this unique and practical Styling System.

Utilizing selections of horizontal aluminum cowling trims with vertical aluminum trims, combined with Vinyl Inlays and virtually unlimited color combinations, one can visualize the infinite possibilities of Interface 33.

To assist in your selections, but certainly not limited to, over 50 professionally developed combinations are presented and may be ordered by Ensemble numbers.



To add to the depth of selection, Amco's two Modular Semi-Custom and Custom systems (offering choice of frame structure) are integrated with Interface 33.

Frame Panel Widths of 19", 24" and 30" and Frame Depths of 18½", 22", 25½" and 30" are all Standard.

All Amco enclosures, accessories and/or components guaranteed 100% against defective material or workmanship for a period of one year from date of purchase.

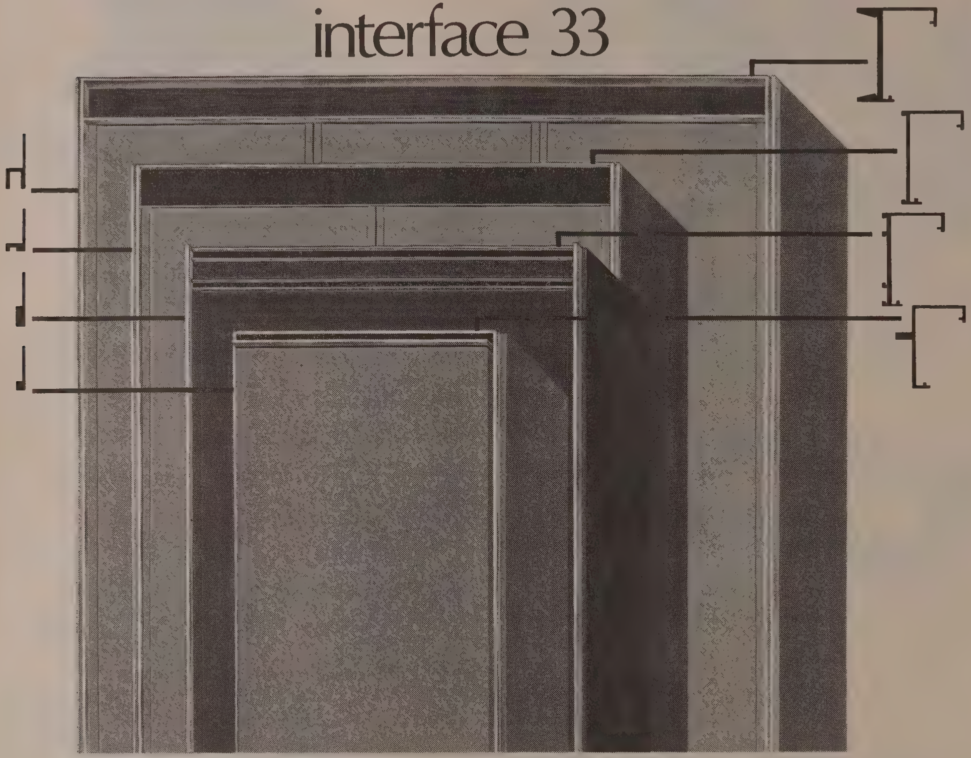
The Ultimate!

modular consoles with superb styling and function

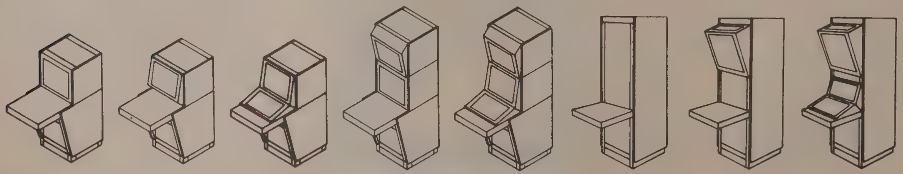
interface 33



Interface 33 is beauty in depth. The custom styling appearance and variety of arrangements provide the *ultimate* compliment to the equipment installed in these consoles.

Standards include a full range of heights, plus selection of depths 22,25½ & 30 inches, and panel widths 19, 24 & 30 inches which may be combined in series mounted consoles. This provides you with economy, custom appearance, and flexibility of arrangement.

Contact us for your free catalog, color selector guide, and the name of our nearest sales representative and distributor.



AMCO®

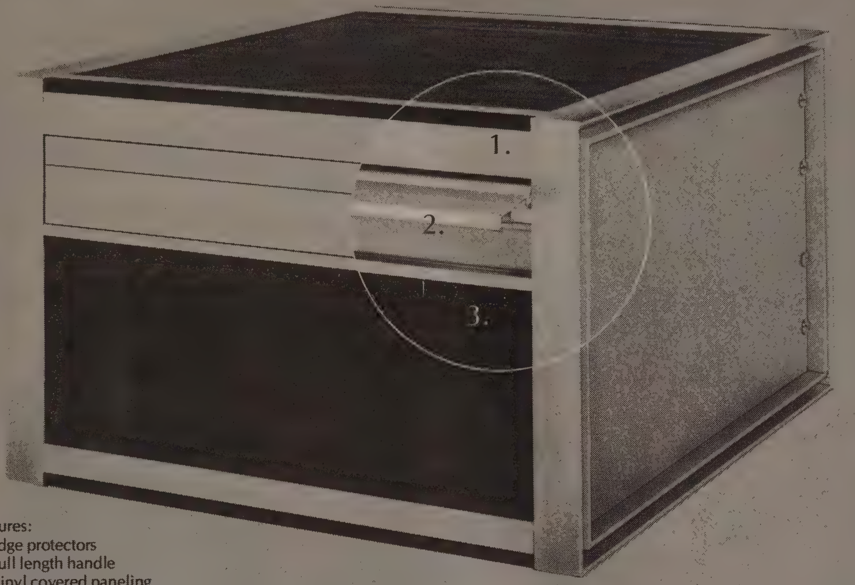
A truly beautiful instrument cabinet



Features:
1. Edge protectors
2. Full length handle
3. Vinyl covered paneling
4. Any pie angle required
5. Panel mounting—horizontal, vertical, or in combination.
6. Economy in size modification—any direction
7. Heavy duty construction

Poly-Dimensional (P/D) Instrument Cabinet (Patents pending)

Cabinet appearance does create a strong impression on customers regarding the quality of the equipment mounted within it. That's why we've stressed design in our new P/D cabinet and backed it up with engineering features, flexibility and quality, making it a truly beautiful cabinet.

Its versatility is fantastic! In addition to the standard sizes, its structural design economically satisfies virtually any desired height, width or depth. Our pie section design allows angular arrangements of any specified degree from 0° on. Its hinged handle is always the full depth of the cabinet for perfectly balanced lifting. And we haven't forgotten the "little" details either, like the edge protectors and vinyl covered paneling. Color selections are available for both paneling and anodized aluminum trim. Our distributors offer immediate delivery on conventional orders, while special sizes and colors require additional time. Contact us for your free catalog 400.

or... We'll alter a standard or create an original

It's your brainchild: That new or redesigned instrument or system. Now to find the cabinet, rack or enclosure to house it.

No problem. Deal with Bud!

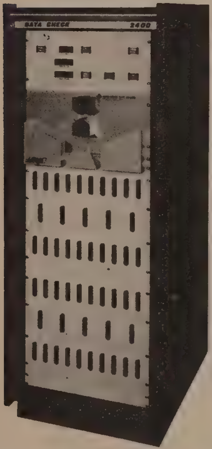
Our special fabrication service is as comprehensive as our standard product line.

A practical and, in many cases, the most economical method of providing a special housing is to alter a standard Bud product to fit your application. That's one approach.

Another is to design an original housing; submitting a quote on a normal production run, then producing a finished quality product. On time!

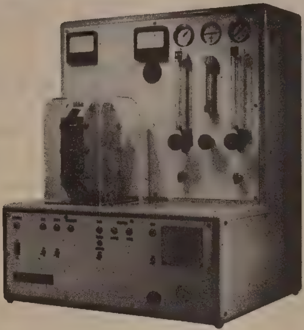
For short runs or pilot models, there's the Bud Imlok system which enables you... or Bud... to design, alter, refine, then build a housing that fits your product and budget to a T.

For further information and quotes on special housings, contact your Bud Representative.

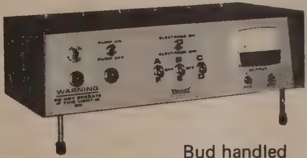


The Bud Series 2000 cabinet rack was altered to house this automatic continuity test system. Standard rack panels were modified to provide required access for testing.

Test stand for determining flow rate of various substances was fabricated from standard Imlok extrusions and connectors. Sheet aluminum panels completed the structure.



By altering a standard Tilt-A-View cabinet, Bud developed this enclosure for equipment which controls the action of an electrode which disintegrates a predetermined shape or aperature in metal.



Bud handled all silk screening, fabricating and finishing operations.

Bud adapted a standard Contour Utility cabinet to house this pulse generator. Front panel was punched to permit installation of switches and controls. Silk screened legends were part of the Bud special fabrication package.

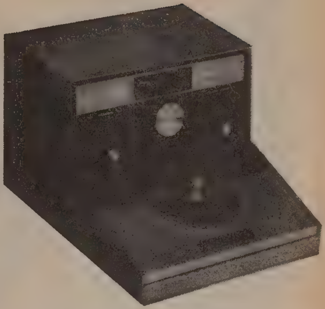
WESTBURY, L.I., NEW YORK



This special enclosure, based on the Bud Compucab design, houses an audiometer unit for a system used for the selection and fitting of hearing aids.

Cabinet is an adaptation of the Bud Series 60 cabinet rack and houses a "Viscometer" unit used for measuring viscosity, scorch and cure rate of elastomers. Front panel, including silk screening, built to customer's specifications.

◀ **C-SERIES**

The custom styling of the CABTRON C-Series rack cabinet features modular construction of all components. Frames may be joined in any number with the continuous aluminum top trim and grill creating a one unit appearance.

S-SERIES ▶

The popular styling of the CABTRON S-Series rack cabinet incorporates the same modular construction features as the C-Series cabinets with the exception of the aluminum top trim and grill.

Both series are fabricated of prime 14-gauge steel and feature all-welded construction. Both series will accept the exclusive CABTRON blower system which utilizes the bottom grills for air-intake instead of vertical panel space.

Cabinets are available in four colors: Light Gray, Dark Gray, Sky Blue, and Black.

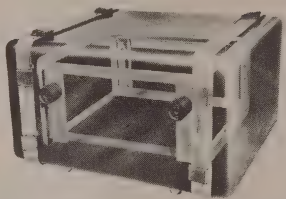
TRANSPORTABLE CABINETS



U.S. PATENT 3,482,895

ECS transportable cabinets are ideal for portable electronic systems. Standard EIA-RETMA dimensions simplify the combining of virtually any group of instruments and accessories.
Typical applications include Military Calibration Systems, Offshore Instrumentation, Flight Line Equipment, Portable Medical and Dental Equipment, Time and Frequency Standards, and Telephone Test Equipment. Seventeen standard sizes can be ordered with rack heights from 5.37 inches to 47.37 inches.

Shock and Vibration PROTECTION

TAPE REEL CASES

ECS manufactures a complete family of carrying cases for storage and transportation of reels of magnetic, instrumentation tape. These cases are available in 2 reel, 4 reel, 6 reel and 10 reel sizes. Cases can be supplied in either dustproof or rainproof styles. Recessed handles, latches and keyed locks are also available. Steel liners for magnetic shielding are optional.
Standard cases fit 600 ft., 1200 ft., and 2400 ft. reels of tape. Tape reels may be edge banded or in plastic canisters.

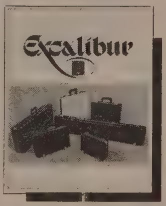
SPECIALTY CASES

EXCALIBUR cases have been created to provide the ultimate in portable protection for fine equipment. EXCALIBUR cases are unique: unrivalled in strength, elegant in appearance.
No other material compares with the warm, natural appearance of the fine woolen finish of these cases. The attractive fabric that sets them apart visually is imbedded in layers of clear, pressure molded fiberglass.
EXCALIBUR cases: for the finest instruments, cameras and electronic equipment.

SEND FOR OUR FREE EXCALIBUR CATALOG.



The ECS pressure molding technique maximizes the glass content of the laminate, and this combination of thermosetting resin and molding technique produces cases with a remarkably high strength-to-weight ratio. They are impervious to temperature extremes ranging from – 65°F to 160°F, to shock, vibration, moisture — the foreign environments that can damage valuable equipment.

ECS containers routinely endure the non-rountine, the most hostile environments of man and nature. They are carried from the bottom of the oceans to the top of the world, effectively isolating their diverse cargoes from shock, vibration, moisture, fungus and corrosion. ECS . . . protection from hostile environments.

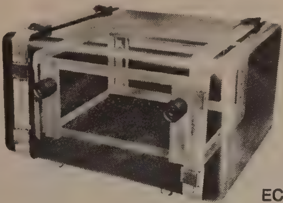
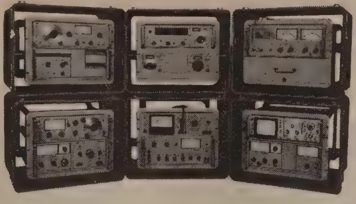
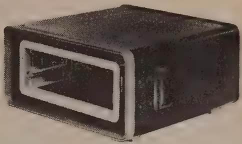
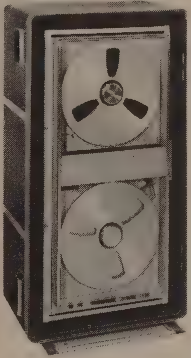
PRIME MOVERS

FROM THE CASE INNOVATORS









ECS transportable cabinets provide instant portability for your delicate instrumentation.

Simply secure your equipment within this shock-mounted case, and it will be protected from rough handling and environmental hazards (rain, salt spray, corrosion, and fungus growth). Remove the front and rear covers using camaction latches, and instrumentation is ready to be operated within the case.

These rugged, pressure-molded fiberglass enclosures have performed outstanding service in many severe applications: Military use in deserts, tropical climates and arctic wastelands. Commercial use as sales demos, for truck and air transportation, for medical electronics to microwave test equipment to cesium beam time standards. The enclosures have withstood drop tests, shock tests, vibration tests and a variety of environmental tests.

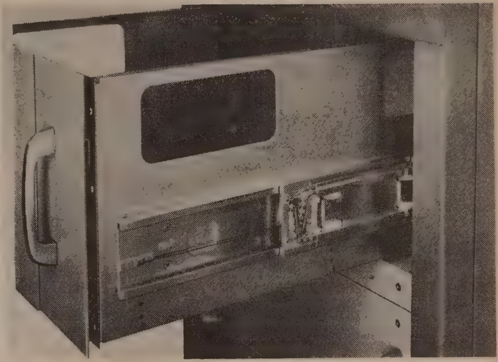
SLIDES AND ACCESSORIES

chassis Trak®

A COMPLETE LINE OF SLIDES

SOLID BEARING



CIRCULATING BALL BEARING

from Simple to Sophisticated...

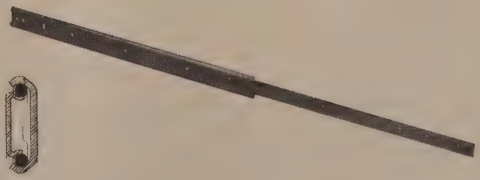
When you're specifying slides, you have many things to consider. You think about type of usage, load-bearing capacity, slide length and travel, slide thickness, type of bearing surface, performance, delivery and cost. Not to mention special optional features such as tilt, detent, lock-out, etc. So it makes sense to go to the single source that carries the most complete line of slides . . . Chassis-Trak.

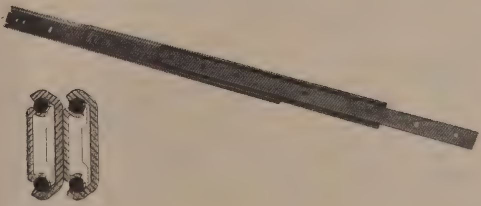
Chassis-Trak slides are available in a wide variety of types, sizes and capacities. Solid Bearing Slides, Linear Ball Bearing Slides, Circulating Ball Bearing Slides, and Bottom Mount Slides are available. Load bearing capacities range from 85# to 1000# per pair.
Simplify your job. Specifiy Chassis-Trak slides. You have a lot to choose from.

X-SERIES / LINEAR BALL BEARING SLIDES

Designed for especially smooth travel and extra long life under maximum loads, these slides are made of cold-rolled steel and operate on carbon steel ball bearings. Available in 2 models, with optional cabinet mount, lock-out, quick-disconnect and recessed mount. **Write for Catalog CT115.**

SERIES	LOAD CAPACITY lbs./pr.	LENGTHS	*TYPICAL PRICE
X-11	100	12″ to 28″	$ 6.92
X-12	250	12″ to 28″	$14.74



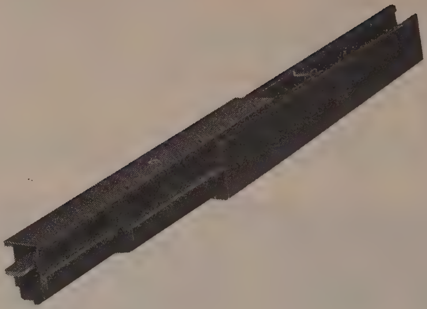


CHASSIS-TRAK

BOTTOM MOUNT SLIDES

Five different models offer load-carrying capacities from 150 lbs./pr. to 1,000 lbs./pr. These slides are made from cold-rolled steel, cadmium plated and irridite dipped, and are available with solid-bearing surfaces or roller bearing, depending on the model. Smooth, easy operation, dependability and long life for heavy-duty applications. **Write for Catalog CT107.**

SERIES	LOAD CAPACITY lbs./pr.	LENGTHS	*TYPICAL PRICE
B-200 (solid)	150	10″ to 24″	$ 16.13
C-386 (roller)	150	12″ to 24″	$ 24.55
D-165 (roller)	400	12″ to 24″	$ 38.85
D-1050 (roller)	1000	22″ to 36″	$117.74



CIRCULATING BALL SLIDES

Chassis-Trak circulating ball bearing slides are designed to support weights up to 500 lbs. per pair over considerable lengths. Slides may be side mounted or, optionally, bottom mounted. Military applications (Models D1002 and D1016) furnished with Poxylube® finish and stainless steel balls. Commercial version (D1038 and D1040) is zinc plated with carbon steel balls and utilizes new "cross-over" end cap, allowing minimum thickness of slide to weight ratio. Model D1040 offers synchronized TWO-WAY-TRAVEL allowing load to be moved smoothly in either direction of center. **Write for Catalog CT129.**

SERIES	LOAD CAPACITY	LENGTHS	SPECIAL FEATURE	*TYPICAL PRICE
D-1002	500 lbs.	20″-60″ in 4″ incr.	Mil version	$69.62
D-1016	500 lbs.	20″-60″ in 4″ incr.	Lock-out	$77.87
D-1038	500 lbs.	20″-60″ in 4″ incr.	Comm. version	$40.21
D-1040	500 lbs.	20″-60″ in 4″ incr.	2-way-travel	$47.19

HOW THE CIRCULATING BALL SLIDE WORKS!

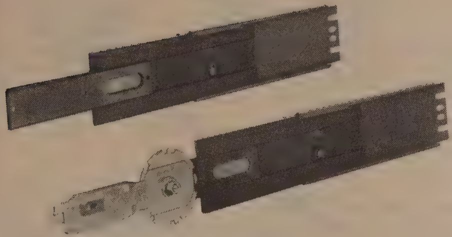
CHASSIS-TRAK

SOLID BEARING SLIDES



A complete line of exceptionally compact, low cost, solid bearing, side mounted, slides for commercial and military application. Permanently lubricated with Poxylube® molybdenum disulfide dry film lubricant to provide smooth sliding action. Chassis-Trak solid bearing slides offer a high degree of immunity to shock and vibration and all slides offer lock-out and quick-disconnect as standard features. Pencil-thin design permits installation of standard 17″ chassis in standard 19″ panel racks. All solid bearing slides are cold-rolled steel except Model D-600 which is lightweight, hard-coated aluminum. **Write for catalog CT104.**

SERIES	LOAD CAPACITY lbs./pr.	LENGTHS	*TYPICAL PRICE
C300	85	10″ to 24″	$ 9.95
C230	125	12″ to 24″	$18.79
D-600	125	10″ to 24″	$31.33
CT	175	10″ to 24″	$27.62
CTR	175	10″ to 24″	$41.72
CTH	275	14″ to 24″	$46.99
CTHR	275	14″ to 24″	$63.47

HOW TO SELECT CHASSIS-TRAK SOLID BEARING SLIDES

Slides are furnished in pairs, with each right and left slide consisting of a stationary section, a corresponding intermediate section and a chassis section. Most solid bearing slides are available with a choice of three stationary sections, determined by the type of mounting, a single intermediate section used for all combinations and a choice of four chassis sections determined by the need for easy access to chassis for servicing.

A Quick-Disconnect system, standard on all Solid Bearing slides, permits the chassis to be removed quickly and easily from the cabinet for servicing when necessary.

AVAILABLE OPTIONS

CABINET SECTIONS

TYPE 1 - CABINET MOUNTING. Designed to fit cabinets or racks having universal RETMA (EIA) hold spacing.

TYPE 2 - STRAP MOUNTING Recommended for use in other than standard installations, or in applications subjected to extreme shock and vibrations.

TYPE 3 - GUSSET MOUNT Permits mounting to front rail only without alignment problems.

CHASSIS SECTIONS

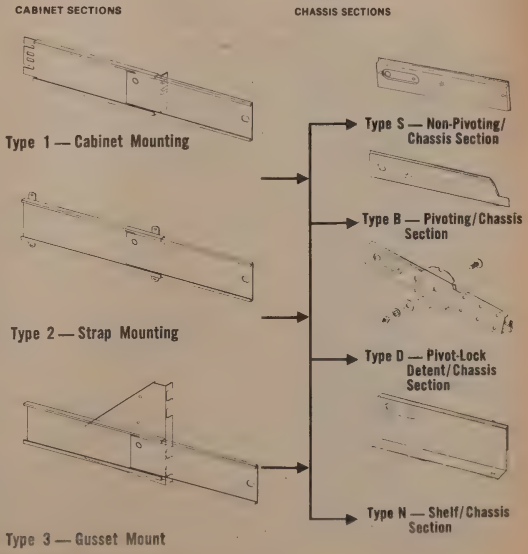
TYPE S - NON-PIVOTING chassis section. Attaches to chassis with side mounting screws.

TYPE B - PIVOTING Chassis section. Chassis pivots up only, for quick access to bottom of chassis.

TYPE D - PIVOT-LOCK DETENT chassis section. Pivots up or down and locks in position with positive detent action. Three, five and seven position detents are available depending on the slide model.

TYPE N - SHELF chassis section. Chassis is supported from the bottom. Used when side mounting screws are not desirable. Series C-300-N furnished with mounting holes for screws. Series C-230, CT and CTH-N are equipped with locating pin so chassis can be quickly lifted off for servicing. Type N chassis section is not available on the D-600 slide.

Available Options

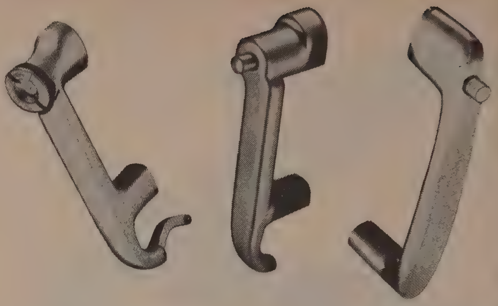


CABINET SECTIONS
CHASSIS SECTIONS
Type 1 — Cabinet Mounting
Type 2 — Strap Mounting
Type 3 — Gusset Mount
Type S — Non-Pivoting/Chassis Section
Type B — Pivoting/Chassis Section
Type D — Pivot-Lock Detent/Chassis Section
Type N — Shelf/Chassis Section

H-SERIES HANDLES

H-Series Handles are smooth, modern-looking. Available plain or with a choice of three panel locks . . . Pushbutton, Pawl Type or Keylock. Some models are available with a plunger or trigger-type external control for external pivot control of the slide mechanism. Die-cast aluminum alloy, with a chip resistant finish of baked-on lacquer or dull black enamel. **Write for Catalog CT108.**

MODEL	*TYPICAL PRICE
HO-4	$4.72
HO-7	$6.78
HO-9	$6.78
HO-10	$6.78



KH-SERIES HANDLES

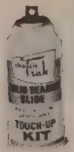
MODEL KHD or KHL	PANEL SIZE	*TYPICAL PRICE
KH-3	3½″	$4.91
KH-5	5¼″	$5.17
KH-7	7″	$5.45
KH-8	8¾″	$5.72
KH-10	10½″	$5.94
KH-12	12¼″	$6.27
KH-14	14″	$6.60

1. All KH handles have threaded stainless steel inserts.
2. End caps are self-extinguishing thermoplastic.
3. Cross member is extruded aluminum, etched and clear anodized.
4. Required mounting hardware furnished.
5. For lengths other than ones listed, contact your local Chassis-Trak Representative or factory.

Write for Catalog CT148

NOTE: Special Lengths — Take next larger size and add $1.10/pair. When ordering specify "D" for Dark Gray or "L" for Light Gray.

CHASSIS-TRAK POXYLUBE® TOUCH-UP KIT



Poxylube®, a molybdenum disulfide, dry film lubricant coating is good for life under normal conditions, but special situations may arise which would make periodic applications desirable. Deeply scratched or damaged chassis slides may be renewed with applications of Poxylube #420. Available in 6 oz. aerosol cans.

*TYPICAL PRICE

Typical prices shown are per pair, in 50 pair quantities, except bottom mount — priced each in quantity of 50 pieces. Includes all mounting hardware except "X"-Series and Circulating Ball Slides. In the case of slides, the price indicates a non-pivoting model. In the case of handles, price indicates a plain handle without lock.

VENT RAK®

ELECTRONIC CABINETS

CHASSIS AND ACCESSORIES

FROM SINGLE UNITS... TO COMPLETE SYSTEMS

SPECIFY VENT-RACK CABINETS

Your systems call for functional packaging. Vent-Rak cabinets provide an enclosure that affords protection, easy access and modern styling. In a compact package. Choose from a complete line of Vent-Rak standard cabinets in almost any size you might need. You can use them as free-standing invidual units or multi-bay installations. You can even specify matching desk-style units. Your system will look like a system should look . . . sleek efficient, reliable.

6000 SERIES

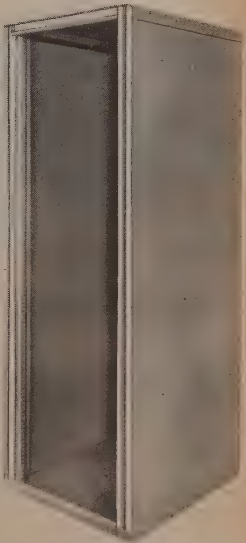
LOW COST/RUGGED COMMERCIAL TYPE CABINET

Available in four standard sizes . . . 24″ deep x 61.25 panel 24 x 70 space 30 x 61.25 and 30″ deep x 70″ panel space, this cabinet is suitable for military, commercial and O.E.M. applications. Special height or depth available on request. Heavy-duty heliarc welded frame with removable side panels for multiple-bay installations. Trim modern styling in two colors, blue or tan. Rear door has attractive handle and magnetic latch. The 6000 Series Cabinet has adjustable rear mounting rails. Optional features such as recessed caster base, special colors, front doors, channel-type mounting rails and writing surface. Competitively priced. Basic prices start at $270.88 in single units. **Write for Catalog VR101.**

3000 SERIES

LIGHT DUTY FOR COMMERCIAL AND MILITARY APPLICATIONS

This light-duty cabinet has non-removable side panels, meets commercial, military and O.E.M. specifications and requirements. Optional aluminum channel trim gives sleek, modern styling. Can be specified in multiple-bay configurations. The 3000 Series Cabinet is available in vertical panel openings from 35.06″ through 84.06″, frame depths from 20″ through 36″. A full selection of available options includes EMI-RFI Shielding, lifting eyes, front door, louvers, Airflo distribution panels, recessed casters, etc. Standard color is textured tan. Basic prices start at $358.05 in single units. **Write for Catalog VR121.**



VENT-RAK

1000 SERIES

HEAVY DUTY FOR ALL COMMERCIAL/ MILITARY APPLICATIONS

The 1000 Series Cabinet is available in vertical panel openings from 14.06″ through 87.56″, frame depths from 18″ through 36″. All heliarc welded steel or aluminum construction, it possesses exceptional strength, yet has outstanding ventilation and accessibility features. Design allows EMI/RFI shielding, as well as custom or multiple-bay configurations to meet or exceed all military and heavy-duty commercial specifications. Standard color is Grey. Options include heavy-duty dolly, side panels hinged at rear and bolted at front, bezels, Airflo distribution panels, blowers, etc. Basic prices start at $464.86 in single units. **Write for Catalog VR116.**

7000 SERIES

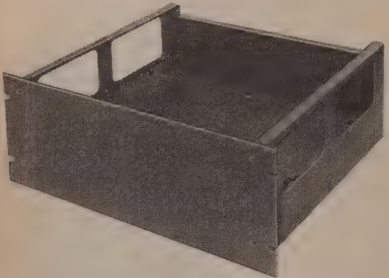
MEDIUM DUTY FOR COMMERCIAL/ MILITARY APPLICATIONS

Designed for accessibility and adaptability, the 7000 Series Cabinet is available in a wide range of sizes. Vertical panel openings from 35.13″ through 84.13″, frame depths from 20″ through 36″. Heavy-duty heliarc welded frame has removable side panels for multiple-bay installations. Top and bottom covers are also removable. Unit has rear door to provide complete accessibility. Adjustable mounting rails and a wide selection of optional accessories provide design flexibility. Standard color is Grey. Basic prices start at $436.15 in single units. **Write for Catalog VR103.**

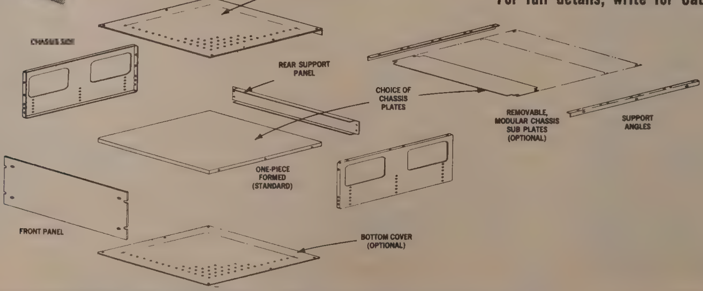
MANY OPTIONS AVAILABLE ON ALL VENT-RAK CABINETS

Starting with the basic cabinet, it is possible to add accessories as required for your specific application. Typical available options include E.M.I./R.F.I. shielding, front door, Airflo distribution panels, louvers, blowers, plugmold, bus bar, cable entry boxes, cutouts, recessed base, caster base, lifting eyes, bezels, removable rear panel, mounting "z"s, writing surfaces, etc. For full details, write for catalog on the particular Series cabinet in which you are interested.

MODULAR ELECTRONIC CHASSIS



Shipped unassembled, with all required mounting hardware, these modular chassis are easy to assemble. The chassis consist of a front panel, pair of chassis sides, rear support panel and a chassis plate. Modular chassis subplates are optional, permitting quick field replacement of individual chassis sections. Standard Vent-Rak chassis are 17″ wide, for a 19″ front panel opening width. A choice of seven heights from 3½″ to 14″ and four chassis depths from 8½″ to 21¼″ offer a wide selection. These chassis have a loading capacity of 100 lbs. per sq. ft. Prices start at $24.92 in single units. **For full details, write for Catalog VR117.**



VENT-RAK

4600 SERIES DESK TOP CONSOLES AND INSTRUMENT CASES

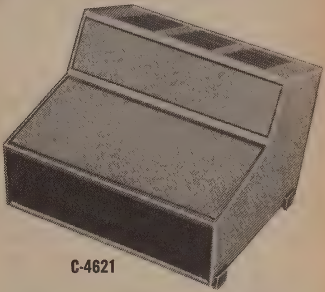
FOR FULL DETAILS, WRITE FOR CATALOG VR143

The 4600 Series Desk Top Consoles incorporate a fresh appearance with distinctive European styling. This series is available in three end panel configurations . . . LARGE (Models C-4610 and C-4611), MEDIUM (Models C-4620 and C-4621) and SMALL (Models C-4630, C-4631 and C-4632). LARGE and MEDIUM can be furnished in standard 19″ or 14¼″ (¾ size) panel opening widths. SMALL is available in standard 19″, 14¼″ (¾ size) and 9½″ (½ size) panel opening widths. Standard front panels meeting Mil Std 189 and EIA RS-310 may be mounted in the 4600 Series Consoles by using optional mounting rails. These consoles are constructed of anodized aluminum end panels and bracing struts with blue, lacquered steel covers.

Consoles are available in kits or as assembled units. Kit prices range from $47.20 to $79.33 per unit in quantities of 10-24 depending on the model selected.

Optional top and bottom front panels of polished bright aluminum complete with all required mounting hardware are available at extra cost.

C-4610

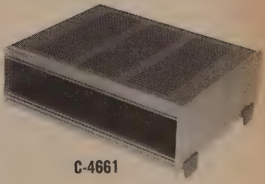


C-4621

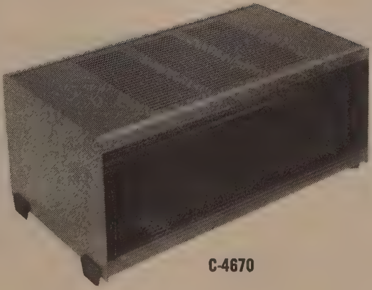
C-4632

Sturdy, lightweight Instrument Cases are available in two basic sizes, with panel widths of 9½″, 14½″ or 19″. Clean, modern looking, these cases are recommended for limited production and one-of-a-kind instruments.

Unique and functional system permits mounting chassis directly to the console . . . affording infinite positioning and eliminating unsightly additional holes in the covers. Covers are steel, finished in blue lacquer. Front panels of bright, polished aluminum can be ordered separately. Shipped in kit form, these cases are quickly and easily assembled. Single unit prices range from $61.13 to 66.00, depending on size.



C-4661



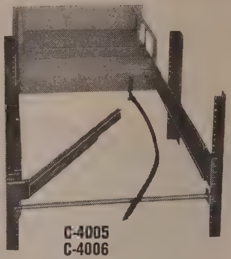
C-4670

ACCESSORIES . . . For full details write for Catalog VR-133.

CABLE RETRACTORS AND CABLE CARRIERS

A complete assortment of Cable Retractors and Cable Carriers to permit power cables to move easily as chassis is opened . . . tuck back out of the way when chassis is in closed position. Model C-4005 and C-4006 Cable Retractors have a spring loaded, telescoping action. Requires only ⅞″ clearance in closed position. Can be used with a pivoting chassis. C-990 Cable Carrier has a three point mounting, providing complete support for unusually heavy or cumbersome cables. With each mounting point hinged, and two telescoping legs, the V configuration will extend up to 30″ or close to only 1½″ behind chassis. Built-in quick disconnect feature. Includes lances for tying cable in place.

D-329 Cable Carrier is cantilever mounted to rear of chassis, unfolding to a maximum of 24″ and folding to only 1½″ behind chassis. Pushbutton disconnect is standard. C-4017 Cable Guide is a simple roller, mounting between rear mounting rails of chassis or rack. Eliminates cable drag during chassis extension. Single screw mount permits infinite vertical positioning. Prices in quantities of 1 to 9 range from $5.23 for C-4017 to $15.90 for C-4006.



C-4005
C-4006

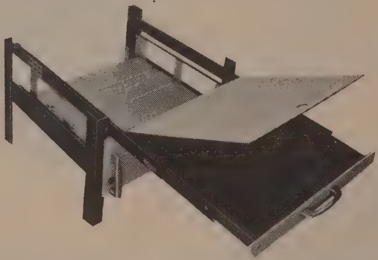
C-990

D-329

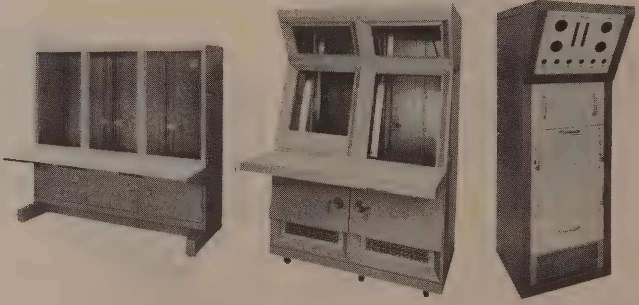
D-4080 RETRACTABLE WRITING SHELF AND STORAGE DRAWER

TWO-IN-ONE . . . DESIGNED FOR YOUR CONVENIENCE

Readily-accessible unit mounts directly to 19″ cabinets and racks . . . anywhere on RETMA, EIA or W-E universal hole pattern. Requires 1¾″ vertical front panel space, retracts flush with other panels. Heavy duty slides will carry a 50# load in extended position. FORMICA writing surface swings up to expose full-width, full-depth storage compartment. Prices start at $49.50 in quantities of 1 to 4.



SPECIAL CABINETS AND MODIFICATIONS TO ORDER



In addition to standard cabinets, Vent-Rak engineers will design and build a custom cabinet to your specfic requirements. Shown above are a few possible configurations. For more information, write, giving us your specfications.

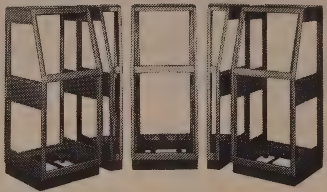
emcor puts it all together

with distinguished modular enclosures

emcor I

the original concept

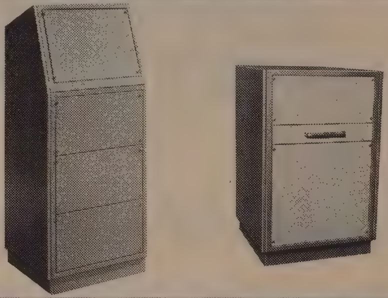
Emcor pioneered the concept of the modular enclosure system for electronic, instrumentation and electro-mechanical applications. The Emcor I series, with hundreds of frames in nine basic configurations, three panel widths, three depths, and literally thousands of components and accessories, offers virtually unlimited design freedom to meet your specific needs at low cost.



emcor II

contemporary classic

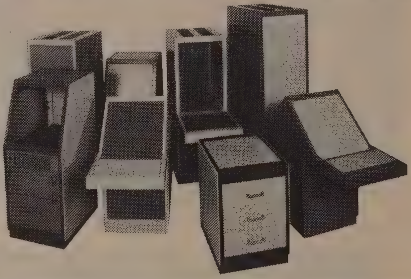
Our top-of-the-line series, with exclusive design and structural features, offers optional modifications to achieve customized individuality. Handsome contemporary styling for the popular square-corner look. Absence of seams in frame construction achieves a picture frame effect. Vertical, corner and instrument frames, including six turret styles with slope fronts from 10° to 80°. And with 11 exciting colors to choose from and combine, custom individuality is assured.



emcor esq

economy with style

Designed to combine the economy of Emcor I with the distinctive styling of Emcor II, the ESQ series is available in nine basic configurations—desk and counter height, extended arm, instrument, turret, and writing top models. Two panel widths — 19″ and 24″; four depths — 18½″, 22″, 25½″ and 30¾″. Hundreds of basic frames and a wide array of components and accessories.



instant emcor

for 3-day shipment

Our "off-the-shelf" series . . . 77 in-stock models from Emcor I, Emcor II and ESQ for shipment within 72 hours after receipt of your order. Vertical frames, slope fronts, desk and counter heights, turrets, low silhouettes, instrument frames, work/writing tops. Plus thousands of components and accessories to meet your equipment housing requirements. That's INSTANT EMCOR—for when time is of the essence.

With INTERLOK, quality comes built-in. Finally, here are cabinets and enclosures that offer your electrical and electronic devices a custom appearance. After all, you are interested in displaying your product in the best possible way, and so is INTERLOK.

INTERLOK enclosures are designed for ease of assembly, versatility and rigidity. They are attractive as well as functional. Selecting the proper enclosures and accessories from the wide variety of standard stock items in the INTERLOK system becomes a pleasure, not an engineering chore.

Then, during assembly many unique design features become apparent. Interlocking aluminum extrusions and panels add a custom look to the enclosures. Outside beauty is enhanced by matching color strips that conceal all hardware after assembly. And, speaking of hardware, our workmanship boasts of drilled and tapped holes for machine screws. Sheet metal screws are not for us.

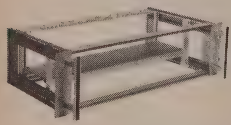
Inside, the enclosures can be subdivided in numerous ways to hold printed circuit boards or other components with access and loading from the front, rear, top and bottom.

INTERLOK not only offers total versatility and beauty in design, but offers all of our products from stock, and through your local electronics distributor. Availability is just one more service from INTERLOK.

The story doesn't stop here. We also have the newest and most exciting control knob available, the all new COLLET KNOB. No more set screws and no more marred front panels; just perfectly aligned control knobs. Interested? Then turn to the knob section in this catalog for the full story.

See if you don't agree that INTERLOK has the answer and the products to back you up no matter what your packaging requirements. Call now for your own "Seeing is Believing" demonstration. Our sales and applications personnel are delighted to show off our products.

Model 12



INTERLOK Model 12 Lightweight Card Frames have the versatility, strength and customer appeal to satisfy any electrical or electronics packaging requirement. The Model 12 is designed to be used on standard E.I.A. 19-inch racks, and can be stacked, subdivided and ordered in any one of 20 standard sizes. The Model 12 is constructed of extruded, all-aluminum sections and is one of the strongest, most rugged, and most durable card frames available.

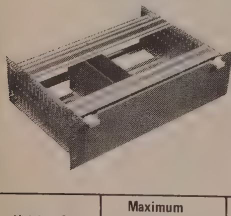
Model 15



INTERLOK Model 15 Universal Card Frame is fully adjustable to accommodate P.C. boards of up to 4.75" high on single height units and up to 10" high on double units. It is designed for standard 19-inch E.I.A. racks and to give you 16.79" (426.7 mm) working width. Four card guides are necessary per card and may be placed as close as .20" (5.08 mm) centers. An optional 2-mm thick anodized aluminum front panel is available.

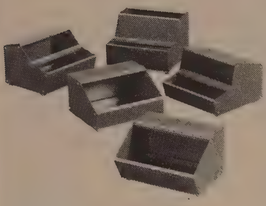
Model 34



INTERLOK Model 34 Sloped-Top Table Consoles are the perfect answer to your table-top console requirements. They are available in five different styles, each giving you that custom look. The Model 34 is designed to give you the maximum amount of interior room. The aluminum profiles are designed to allow access to the top, front and rear of the unit.

The vinyl-clad panels give your product a look and feel of elegance and customer acceptance. There are also optional front panels available. These are satin-finished clear anodized panels that are 3-mm thick.

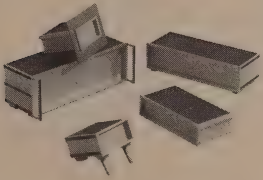
Model 36



INTERLOK Model 36 Enclosures are designed to be used in any number of applications - for bench top or portable instruments, or as a subassembly in a larger unit. The entire assembly is made of lightweight, sturdy, anodized aluminum and the top and bottom panels are blue vinyl-clad aluminum which add that custom look to your product.

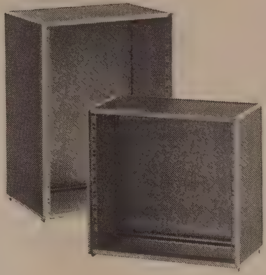
Model 1500



INTERLOK Model 1500 Cabinets are designed to accommodate one or more standard 19-inch E.I.A. rack mounting units. There are 12 different standard configurations available. All units come with blue vinyl-clad top and side panels, and a 3-mm clear satin-finish aluminum rear panel. All structural members are anodized extruded aluminum.

The Model 1500 is ideal for those applications where looks and strength are both important. From the engineering laboratory to the computer operation, INTERLOK has the right answer to your cabinet needs.

Cabinet Height		Order Numbers for Various Depths

Model 1520

INTERLOK Model 1520 Equipment Racks are designed to house standard 19-inch rack mounting units. What makes it one step above any other equipment rack is the overall design. It has built-in air ventilation by means of an elevated white formica-like top, leveling feet, and optional blue vinyl-clad aluminum side panels that quickly slide into place. The side panels convert the equipment rack into a custom cabinet suitable for any office surroundings.

Special side rails and vertical adaptors are available to further subdivide the cabinet. The cabinet is easily accessible from all four sides, making repairs much easier.

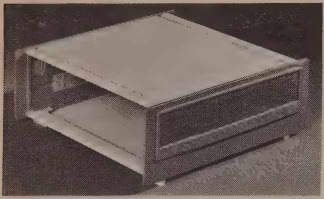
OPTIMAPAK features sculptured side panels of engineering structural foam with a high strength to weight ratio and self-retracting handles. Our most versatile design allows you to order only what your application requires.



1. OptimaPAK Case
The user may provide his own chassis and panels. Components and subassemblies can be mounted directly to mounting holes provided in the case sides and crossmembers.

Panel Height (in.)	Panel Width 17.40″ Model No.	Panel Width 19.00″ Model No.

OPTIMADESK...ENDS THE UGLY CABLE TANGLE!

- Spacious storage capacity ends unsightly cable confusion and provides for terminal/equipment mounting and cable routing. An exclusive with OptimaDesk.
- Leg assembly easily adjusts pedestal to operator's comfort level (standard desk height of 28.00″ or keyboard height of 26.25″).
- Color-coordinated cabinets add both rack mounting facilities and compact storage space to your data console.
- Rolled front edge guarantees operator satisfaction and comfort.

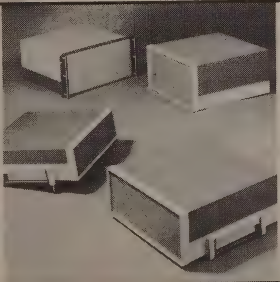
• key lock doors • louvers • multibay options • stabilizers • casters • chassis slides and angles • drawers • writing surfaces • shelves • blowers

Optima 17—A unique combination of chassis and case. Great access and styling. Available in 4 configurations: (1) Case only with rubber feet (2) Side handle with feet installed (3) Side handle with tilt stand installed (4) with rack adapters. Four panel heights —3½″, 5¼″, 7″, 8¾″. Panel width is 16.09″ and panel-to-panel depth is 16.22″



Optima Consoles—An adaptable system of instrument housing, counter, and storage space. Crafted in aluminum, steel, chrome, and plastic laminates. Available in one-bay (26.5″ w.), two-bay (46.25″ w.), and three-bay (66″ w.) units. 19-inch instrument cases may be mounted above or underslung below. Three overall depths are offered (24″, 30″, 36″)

• Drawers • kick panels • cable troughs • power outlets

- **Dependable Quality**—Materials and workmanship are subjected to a formal quality control program.
- **Competitive Price**—Our price includes complete assembly of components and installation of accessories.
- **Structural integrity**—Optima enclosures do not depend on your equipment for strength and rigidity.
- **Flexibility**—Ease of access and disassembly, dozens of color combinations, and a large selection of accessories help you adapt to specific needs.
- **Customer Service**—Our customer representative is retained to see that you are satisfied. The Optima 5 Program provides quick service for prototype and trade show needs.

Premier Metal Products Co. has specialized in the sheet metal fabrication of electronic enclosures and accessories for over 25 years.

The greater majority of products produced are standard catalog items. Extensive inventories are manufactured and maintained to enable Premier to give quicker service and more competitive pricing consistent with high quality designs engineered into our standard lines.

Modified standard and special designs are manufactured on order. Engineering assistance and quotations are available through our representative organizations and plant engineering department.

Premier products are also available through a nationwide network of Distributors.

PREMIER TRIMLINE INSTRUMENT CASES

TIC-031517
Free Standing Unit Convertible
To Rack Mounted Installation

SPECIAL DESIGN SIZE (15⅝″ PANEL WIDTH)

Special design size has been incorporated into the Trimline Instrument Case line which makes the entire case easily adaptable into standard 19″ rack systems. Overall case width accommodates rack adapters to fit cleanly into 19″ rack widths. Overall case height conforms to standard panel heights, requiring no fillers to adjacent panels above or below the Trimline Case. Ideal for bench or test instrumentation that might need transfer into a rack mounted system without requiring a different sized enclosure for each usage.

DISTINCTIVE ELECTRONIC PACKAGING.
HIGH IN QUALITY AND DISTINCTION — MODERATE IN COST.
WELDED CONSTRUCTION THROUGHOUT EXCEPT FOR TRIM.
EIA UNIVERSAL SPACING (⅝″ — ⅝″ — ½″).

Designed to meet engineering and marketing design requirements for OEM electronic products packaging for free standing or rack mounted instrumentation or systems. Cases trimmed front and rear with anodized extruded aluminum and decorative vinyl inlays. Finishes are available in a wide choice of standard Premier colors in either fine grain textures or semi-gloss enamels. Case body #20 gauge cold rolled steel. Panel and accessory mounting channels #16 gauge cold rolled steel. Hand grip mounting channel and stiffener. Top carrying handle supplied with 9½″ panel widths; side hand grips supplied with 15⅝″ and 19″ panel widths. Panel and interior equipment mounting channels are provided with holes on EIA and WE standard spacing to accept #10 Tinnerman speed nuts and screws. Ventilation provisions and other modifications available on request. Provisions for equipment mounting permit the ready use of the following accessories: tilstand, front and rear panels, slides, rack adapters, chassis and shelf support angles, interior mounting matrix panels for components and/or brackets, and access doors with or without locks. Standard finish, smoke blue texture.

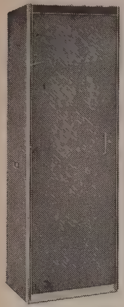
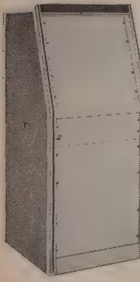
PREMIER TRIMLINE SERIES



TVA Series
(Front Door Extra)



TSA Series
(Front Panels Extra)

Trimline series presents trim, classic styling and provides major design requirements for protection, accessibility and cost-saving mounting of electronic equipment. Frame is #14 gauge steel formed uprights, welded to formed one-piece top and base sections. Base has knock outs and cutouts for cables, leads and mounting of concealed casters. Two pairs of #12 gauge steel panel mounting angles, fully adjustable, have EIA spaced 10-32 tapped holes. Screws with nylon washers are furnished. Trim serves as functional decor in system design, made of extruded aluminum with walnut or black grained vinyl inlay, provides extra 1″ deep recess for door mounting and panel area. Vertical trim is ⅝″ wide with 5⁄16″ inlay; horizontal top trim for use with or without front door is 2⅛″ wide with 1 11⁄16″ inlay; 3″ top horizontal trim covers full face of frame top with 2 9⁄16″ inlay. Outside removable, flush side panels are formed of one-piece of #16 gauge steel with welded stiffeners; give quick access to enclosed equipment for inspection and service. Doors formed from one piece of #16 gauge steel with full length welded vertical channel reinforcement; have concealed hinges; are instantly detachable without tools. Fully gasketed doors can be mounted for left or right hand operation and are held closed with full length magnetic stripping. Brushed aluminum handle and locking latch with 2 keys are provided. Standard finish, smoke blue texture. For other colors, refer to chart on page 2. TVA Series Assemblies: Includes frame with trim, 2 pair of adjustable panel mounting angles, 2 outside removable side panels, rear mounted door with handle, lock and keys. Frame includes trim and 2 pair of panel mounting angles. TSA Assemblies: Same as TVA Series above and fixed angles on front sloping panel area. Sloped front 19° from vertical. **To order specify color, trim style and door position (LH or RH).**

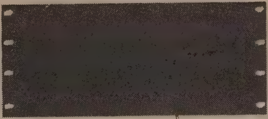
PREMIER PANELS

BLANK RACK PANELS

9½″ — 19″ — 24″ — 30″ WIDTHS



Material:

Steel - #12 Ga. (.104) Cold Rolled
Aluminum - ⅛″ thick —
5005-H36 Alloy
Aluminum - 3⁄16″ thick —
6061-T6 Alloy

FINISHED IN LIGHT GRAY

Available in other finishes at additionali cost. See page 50.

Masked Aluminum Panels:

Made of bright natural aluminum covered on both sides with special self-adhesive paper. Drilling or milling can be done on paper in place, affording complete damage protection. Paper is removed simply by peeling.

Mounting Slots

All panels have closed slots for rigidity with spacing according to E.I.A Standards. Open slots available on special order.

Note: All panels are cut 1⁄32″ less than nominal height.

Modifications Available

- ⅛″ thick Aluminum Panels available in 6061T6 alloy.
- Special finishes, including unfinished.
- Special Heights.

PERFORATED PANELS

- Made of 20 ga. steel with 1⁄16″ diameter holes on 3⁄16″ staggered centers.
- Edges formed on 4 sides.
- Overall depth ½″.
- Each panel has mounting holes on each side.
- Finished in Light Gray enamel.

Panels for TIC Series 15⅝″ and 9½″ widths are available in ⅛″ blank aluminum or masked aluminum.

PREMIER

CHASSIS SLIDES-WORK SHELVES DRAWERS

PRINTED CIRCUIT CARD HOLDERS

Provides Extensive Adjustability in Accommodating Card Heights and Depths and Connector Mounting Centers

- Units accommodate card widths from 2⅞″ to 8″; card depths to 14½″
- Fit standard 19″ and 24″ wide racks for 5¼″, 7″, 8¾″ panel heights
- 19″ wide frames hold up to 27 cards; 24″ wide frames hold up to 36 cards
- Supplied with two adjustable rear connector panels made of ⅛″ iridited aluminum, having connector mounting holes tapped 4-40 on .200 centers; height fully adjustable
- Frames made of 16 gauge steel and finished in light gray enamel
- Units shipped K.D. with all necessary hardware
- Guide (G Series) sold in packages of 5 pair and ordered as a separate item
- Guides are supplied with push rivets for easy positioning
- Guides made of 14 gauge caustic etched and iridited aluminum as per MIL-C-5541

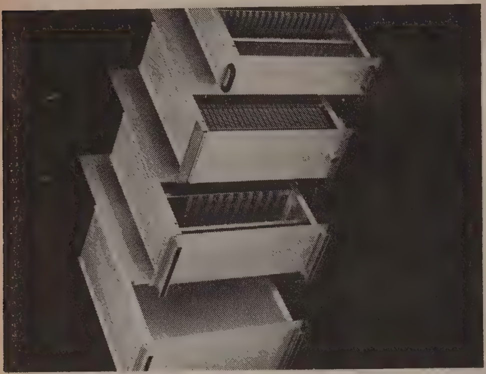
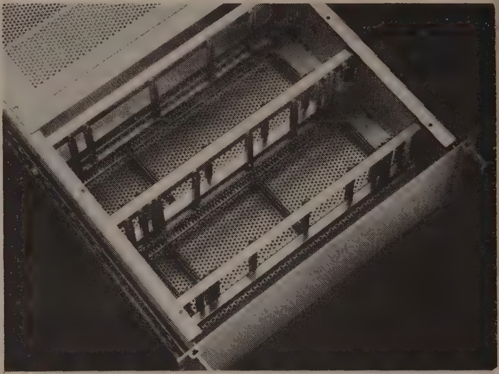
TECHMAR OMNICLOSURE™

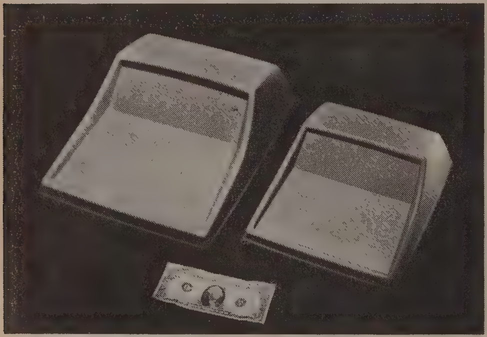
HAS IN STOCK FOR IMMEDIATE SHIPPING ANYWHERE:



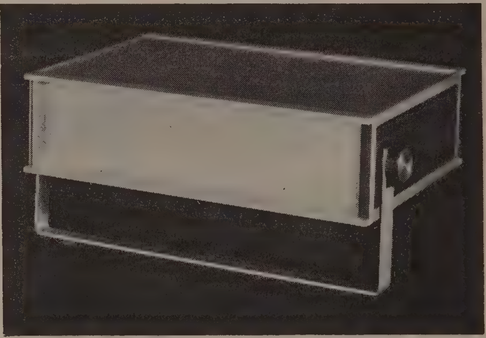
RACK-MOUNTING CHASSIS kits and parts in 7 EIA heights with pre-punched hole patterns for assembling in thousands of configurations; many options and accessories.



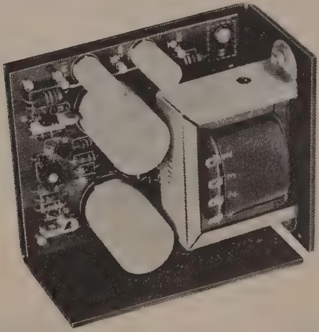
CARD CAGE kits and parts, plated steel guide frames and connector rails, plastic snap-in guides. For assembling in rack-mounting chassis units.



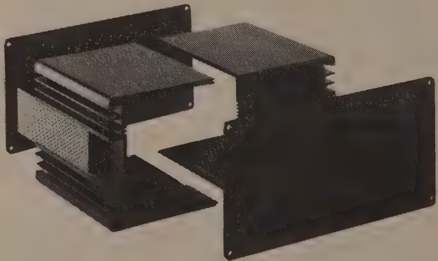
MINI-CONSOLES for enclosing small instruments economically in high style. Textured high-impact thermoplastic. Stocked in 2 sizes, 6 color combinations.



PORTABLE INSTRUMENT ENCLOSURE kits in 54 configurations with optional swing handle/tilt stand, PC card capability, choice of 5 vinyl trims.



POWER SUPPLIES, regulated, AC to DC, single or dual output, open-frame, guaranteed long life in normal or severe environments.



SUBASSEMBLY HOUSINGS, black anodized aluminum, integral card guides. Parts for 45 configurations in stock, 3 x 3 x 4 to 8 x 8 x 4, including 9 with heat sinks.

FREE CATALOG INCLUDES DIMENSIONS AND PRICES.

TECHMAR CORPORATION, 2232 SO. COTNER AVE., LOS ANGELES, CA 90064, PHONE (213) 478-0046

ALL-ALUMINUM RACK-MOUNTING KITS (ARK SERIES)

Besides being your rescue vehicle from a flood of packaging troubles, the ARK series is the third-generation, lighter-weight version of the original prefab chassis system for immediate shipping from factory. Convenient "erector set" hole patterns let you assemble in a mega-number of configurations. Side frames are strengthened by double-bend forming. Kits and parts are stocked in seven EIA heights from 3½" to 14", and are compatible with the earlier RMK series, which is still available. Order the basic ARK kits from the table on this page, and add dash numbers from page 2 to get your choice of options, some of which reduce the kit price by as much as 18%. Or order by part, from the list on page 3. Many interfacing dimensions are shown on the exploded view or table on this page; for other information phone Techmar Applications Engineering at (213) 478-0046.

IN THE WORDS OF OUR CUSTOMERS . . .

"Looks very good and is adequately sturdy." Howard Burch, Stanford Research Institute

"Satisfied with both appearance and engineering." Emory Johnson, Hughes Aircraft, Fullerton, California

"We appreciate very much your fast service." R. Boutvrette, Realtronik Research & Development

"Filled our needs." G. Harry Robinson, Physics International

"Satisfactory in every respect." Leonard W. Rieck, Clevite Ordnance

"Arrived promptly and was everything we expected." Stephen R. Smiriga, Chemistry Dept., University of California, Berkeley

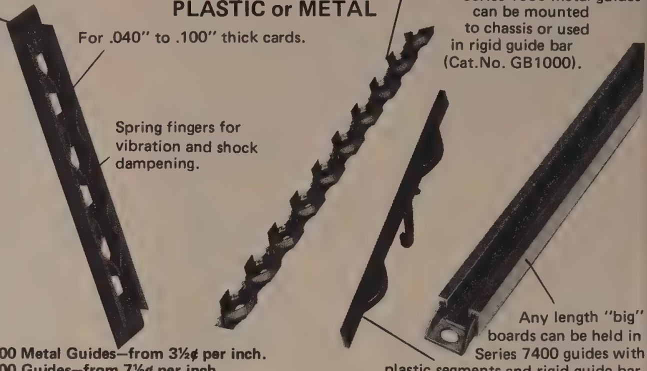
"I am well pleased with the ease of assembly, appearance and general function of the chassis." J. Steffik, FMA, Inc.

"We appreciate the fast, accurate service and deliveries. Don't change. A fine product suits our needs." Jack Grove, Test Equipment Dept., Hughes Aircraft.

"Appearance very good. Well engineered. Versatile." Leonard M. Budzynski, Technical Center, Owens-Illinois

UNITRACK CARD GUIDES

Any p.c. card—large, small, "hot" or to be grounded can be held firmly with the patented spring finger action that *only UNITRACK guides offer.* Vibration and shock dampening are features no other guide offers. The cantilever spring action grips cards from .040" to .100" thick, yet they slide smoothly . . . insertion or extraction. UNITRACK guides are available in standard sizes or in long lengths for customer make up of polycarbonate plastic, phosphor bronze, beryllium copper or plastic or metal in an extruded housing. UNITRACK card guides are accepted for military or commercial applications.



PLASTIC or METAL

Snap in button or hole for quick assembly.

For .040" to .100" thick cards.

Spring fingers for vibration and shock dampening.

Metal for "hot" boards or grounding.

Series 1000 metal guides can be mounted to chassis or used in rigid guide bar (Cat.No. GB1000).

Any length "big" boards can be held in Series 7400 guides with plastic segments and rigid guide bar.

Prices: Depending on quantity and size.
Standard UNITRACK Guides—14 to 26¢

Series 1000 Metal Guides—from 3½¢ per inch.
Series 4700 Guides—from 7½¢ per inch.

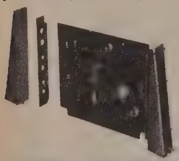
VERSAMOUNT® Brackets

in metal or plastic for mounting p.c. cards, vertically on chassis.



Wherever you need to mount a p.c. card on a chassis, the Versamount provides a firm support bracket. Made in plastic (VM7500) or metal (VM7700) so that grounding can be accomplished. Just drill 2 holes and mount with one screw. **VM7500 Price from 55¢ a pair up. VM7700 Price from 82¢ a pair up.**

PAK-RAK®
(Cat. No. 15625)

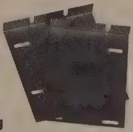
Strong, sturdy in-plant storage rack, test rack or shipping container. An easy to assemble, low-cost container that holds p.c. cards in UNITRACK guides.

Price $5.00 each (UNITRACK guides not included).

UNITRACK CARD RACKS

Low cost, easy-to-assemble, sturdy, rigid racks built to standard EIA sizes for mounting in 19" cabinetry. These racks can be supplied complete, or the individual parts may be ordered separately. Versacage card racks are available in these standard sizes. Specials are also available.

Cat. No.	Card Size	Price
VC-119-450	3½" to 4½" wide, up to 6½" long	$23.00
VC-119-625	4½" to 6¼" wide up to 6½" long	24.00
VC-119-800	6¼" to 8" wide up to 6½" long	25.00
VC-119-975	9¾" wide up to 6½" long	26.00
VC-219-450	3½" to 4½" wide up to 9¼" long	26.50
VC-219-625	4½" to 6¼" wide up to 9¼" long	27.50
VC-219-800	6¼" to 8" wide up to 9¼" long	28.50
VC-219-975	9¾" wide up to 9¼" long	29.50
VC-119-D-450	For two cards 4½" wide up to 6½" long	38.00
VC-219-D-450	For two cards 4½" wide up to 9¼" long	45.00



End Plates

Versacage end plates may be purchased separately. Prices range from $5.00, depending on size and quantity.

HOLDER BARS AND CONNECTOR BARS

Pre-punched bars of rigid aluminum extrusions are available for three card packaging densities . . . .200", .500" or .750" centers.

Pre-punched bars also available for offset connectors.

Price of Connector Bars (Cat. No. CB1702) —from $1.50 ea.

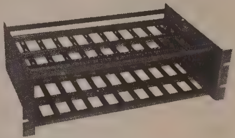
Price of Holder Bars (Cat. No. HB1701) —from $1.50 ea.

Price of Angle Brackets—25¢ ea.

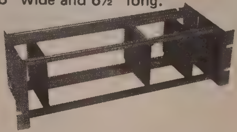
Back Panel Accessories

Versacage End Plates accept special brackets (Cat. No. UB-) so that back panel may be removed or attached in one piece when using wire wrapping connection techniques. Standard and special sizes available.

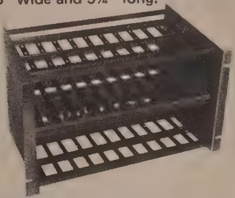
Price: from 75c



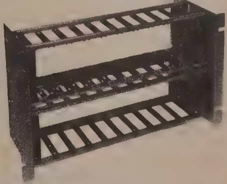
SERIES 119—Sizes for cards 3½" to 8" wide and 6½" long.



SERIES 219—Sizes for cards 3½" to 8" wide and 9¼" long.



SERIES 119-D—Similar to Series 119 but for two rows of cards.



SERIES 219-D—Similar to Series 219 but for two rows of cards.

Heat Dissipators Kooler-Krown®

Provide effective heat dissipation from heat producing power components in standard can packages. Simply push Kooler-Krown on can. Spring action holds Kooler-Krown firmly in place. Large contact area on can provides excellent heat dissipation.

For TO-3 power transistors
Dissipates up to 10 watts @ 100°C
Price 24¢ up CAT. NO. KK 750

For TO-5 power transistors
Dissipates up to 2½ watts @ 100°C
Price 10¢ up. CAT. NO. KK 300

For TO-8 or TO-66 power transistors
Dissipates up to 4 watts @ 100°C
Price 10¢ up. CAT. NO. KK 500

Note: Application of thermal grease slightly increases effectiveness. Also, forced convection will increase effectiveness.

Triac-Kooler™ CAT. NO. TR 60

Packaged triacs can be cooled effectively to add greater life and performance with the Triac-Kooler. It is held firmly to the thermal pad of the triac by a snap-in fastener. The intimate contact to the thermal pad and the large fin area dissipate heat and eliminate damaging heat build up in triacs.

Price 17¢ up (includes fastener).

Note: Application of thermal grease slightly increases effectiveness. Also forced convection will increase effectiveness.

Sales Representatives and Stocking Distributors in major industrial areas.

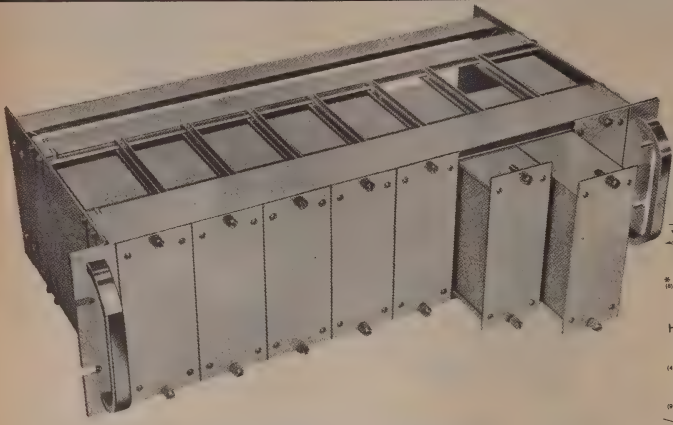
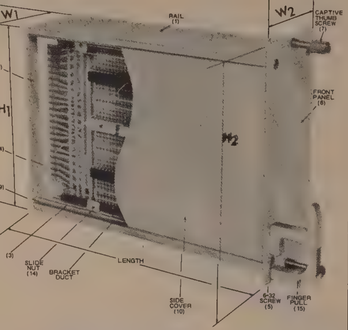
Vector VERSATILE CARD CAGES



CMA3-20 MODULE CAGE
For EFP204-6.6 Modules Only



VECTOR-STRUT MODULE CAGES

These all-aluminum cages for 19 in. rack or table-top mounting with Vector encasements provide sturdy, mechanically excellent housings in which to house electronic assemblies. Units are shipped completely assembled and modules, which are ordered separately, may be plugged in immediately after assembly. Module cages have a finished professional appearance which enhances equipment packaged within. Module guides are preinstalled in the cages for either ten 1.6 in. wide or eight 2 in wide EFP Modules.

Connectors may be mounted to the two rear cross members (T-struts) which come preloaded with required 4/40 steel nuts. Alternately punched metal connector plates may be attached to the rear cross members. In either case the slotted cage side walls and bracket mounts on the cross members provide easy connector position adjustments. All cage parts are satin finished anodized aluminum. Special conductive iridite finish for RFI application available on order. Cages for other size modules and special RFI modules for these cages are available on order.

EFP MODULES

EFP Modules for the accompanying Vector-Strut cages are anodized all-aluminum cases supplied in 1.6 in. and 2 in. wide sizes. They consist of a blank 0.080 in. thick front panel with attachment hardware, blank or "OF" type 0.080 in. thick back panel for protruding circuit card edge fingers, two rear sliding side covers, plus top and bottom rails with 0.075 in. wide grooved inner surface for circuit cards. Two captive 10/32 thumb screws are provided, one of which is a jack screw type to facilitate module insertion/withdrawal in high-insertion-withdrawal-force connectors. Circuit boards or Plugbords are held by the 0.075 in. wide grooves which run the entire length of the top and bottom rails. Lateral card positioning is accomplished with furnished hardware.

Modules are supplied unassembled for user fabrication required, followed by assembly.

56 other Modules are also available in widths including 1", 3", 4.5" and lengths of 4.5" and 11.5". Fully assembled matching cages are also available. Specials to order -- write factory for additional information.

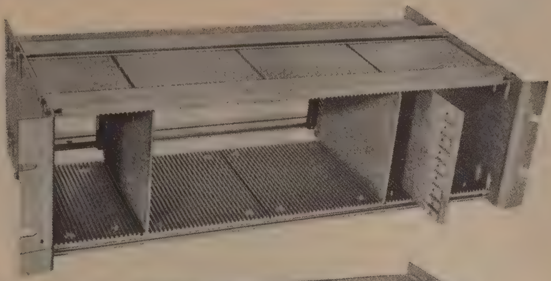
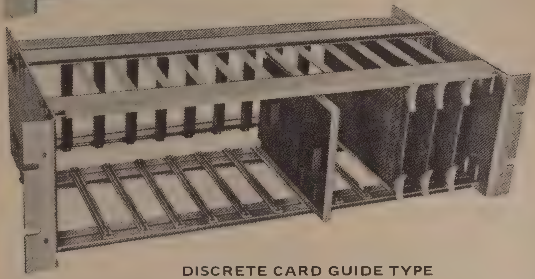
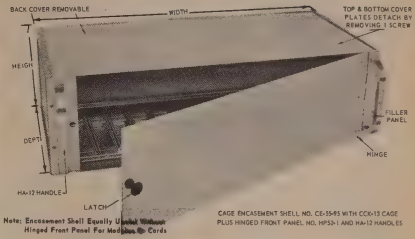
Vector RACK MOUNTABLE CAGES



CONTINUOUS CARD GUIDE TYPE



DISCRETE CARD GUIDE TYPE



Note: Encasement Shell Equally Useful Without Hinged Front Panel For Modules Or Cards

CAGE ENCASEMENT SHELL NO. CE-55-95 WITH CCK-13 CAGE PLUS HINGED FRONT PANEL NO. HP52-1 AND HA-12 HANDLES

ASSEMBLED CARD CAGES

Supplied Fully Assembled - Riveted Card Guides
Connectors Are Easily Positioned Without Hole Drilling
Accommodate Most Popular Card Sizes
Adjustable For Different Card Widths
Ruggedly Handsome - Industrial Quality - Anodized Finish

Two connector mounting struts at rear are bracket mounted and furnished with 21 pairs of captive 4/40 nuts which may be positioned anywhere for fast, easy connector mounting. Heavy aluminum side walls have standard hole pattern for rack mounting, and slots for adjustment to accommodate narrower cards. Card marker strips are included. Ejectors, when used on installed cards, work readily against front cross members.

DISCRETE GUIDE TYPE

Cage supplied with riveted aluminum or plastic card guides for 1/16 in. thick cards attached to heavy extruded aluminum cross members.

CONTINUOUS PLATE TYPE

For maximum card density and position flexibility. Extruded aluminum plates with 0.075 in. wide .100 in. deep grooves on 0.150 in. centers are riveted to heavy aluminum cross pieces.

NEW AND BEAUTIFUL CAGE ENCASEMENTS

The CE Series Cage Encasement Shells provide the finishing touch needed when a portable table-top unit is desired rather than rack mounting. Good accessibility is provided by easily removable top, bottom and rear covers. In addition, the cage can be quickly removed from the encasement shell by removing the screws from the front panel and the top and bottom covers. Supplied in knock-down form consisting of two assembled side panels, plus top, bottom and rear covers and required screws. The hinged front panel is an optional accessory (see below).

HINGED FRONT PANEL – SIDE HINGED

Hinged Front Panels, for card protection and improved appearance, come in easily assembled kit form which includes the hinged panel with latch, striker plate and two filler panels. Panels are of 1/8 in. thick aluminum with a clear anodized finish. All members (except screws) are clear anodized aluminum. (See ordering information on Card Cages for part numbers and dimensions.)
